THIS BRITISH STANDARD, having been approved by the Documentation Standards Committee, was published under the authority of the General Council on 29th March, 1968.

SBN: 580 00157 1

In order to keep abreast of progress British Standards are subject to periodical review. Suggestions for improvements will be recorded and in due course brought to the notice of the committees charged with the revision of the standards to which they refer.

A complete list of British Standards, numbering over 4000, fully indexed and with a note of the contents of each, will be found in the Institution's Yearbook, price 15s. The BS Yearbook may be consulted in many public libraries and similar institutions.

Attention is drawn to the following British Standards:

BS 1000A.	Universal Decimal Classification: Abridged English Edition.	
BS 1000C.	Guide to the Universal Decimal Classification (UDC).	
BS 1000.	Universal Decimal Classification (English Full Edition).

## CO-OPERATING ORGANIZATIONS

The Documentation Standards Committee, under whose supervision this British Standard was prepared consists of representatives from the following Government departments and scientific, technical and professional organizations:

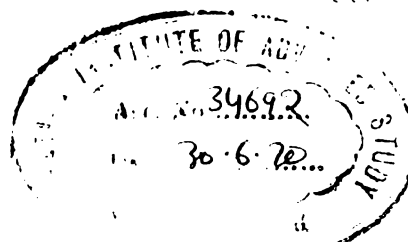

*Aslib	National Lending Library for Science and Technology
Biological Council	National Library of Scotland
Bodleian Library	National Library of Wales
Booksellers' Association of Great Britain and Ireland	National Reference Library for Science and Invention
British Council	National Reprographic Centre for Documentation
British Museum	Periodical Publishers Association
British National Bibliography	Permanent Committee on Geographical Names (Royal Geographical Society)
Cambridge University Library	Publishers' Association
*Commonwealth Agricultural Bureaux	Royal Institute of British Architects
Department of Education and Science: Office for Scientific and Technical Information	Royal Society
H.M. Stationery Office	Science Abstracts
*Institute of Information Scientists	*Science Museum Library
Institute of Journalists	Society of Indexers
*Library Association	*Standing Conference of National and University Libraries (SCONUL)
Microfilm Association of Great Britain	
*Ministry of Technology	
*National Central Library	

The organizations marked with an asterisk, together with the following, were directly represented on the committee entrusted with the preparation of this standard:

Association of British Library Schools	Royal College of Physicians
British National Film Catalogue	Royal Institution of Chartered Surveyors
Classification Research Group	United Kingdom Atomic Energy Authority
College of Aeronautics	University College London, School of Librarianship
Ealing Technical College, School of Librarianship	Individual experts
Pharmaceutical Society of Great Britain

## FOREWORD

THE English version of the Universal Decimal Classification (UDC) is being prepared and published as BS 1000 by the British Standards Institution (BSI) at the original joint request of the British Society for International Bibliography (BSIB) and the Association of Special Libraries and Information Bureaux (ASLIB), now both amalgamated as Aslib. The first English full edition is the fourth international edition authorized by the Fédération Internationale de Documentation (FID) and has the approval of the Education Foundation, Lake Placid Club, New York, proprietors of the Dewey Decimal Classification, from which the UDC derives.

This section is part of the English full edition and existing and prospective users are strongly advised not to use it in isolation but in conjunction with the Abridged English Edition, BS 1000A. The abridged edition refers to many subjects of interest to users which are not listed in this schedule and it provides a conspectus of the whole scheme, together with an introduction to its use. For further practical information about the principles, application and utilization of the scheme, users should refer to BS 1000C 'Guide to the Universal Decimal Classification (UDC)'. (A survey of UDC editions in English and other languages will be found on page 14 of this volume.)

Because the BSI is making every effort to complete the first English full edition of the UDC by publishing without delay those parts of BS 1000 which are lacking, it is possible that some errors, imperfections and inconsistencies will be found in this section. The Institution would like to emphasize, however, that every user has the opportunity to submit suggestions for improvements; these will be welcomed and considered by the appropriate bodies. Improvements involving major changes in the order and arrangement of the classification can only be introduced by international agreement (*via* the British Standards Institution) but criticisms of terminology, translation, etc., affecting the English edition as such can be dealt with by the BSI.

This edition of UDC 613 Hygiene includes modifications authorized in 'Extensions and corrections to the UDC' up to and including Series 6 Number 3.

## Notes on UDC 61 Medicine

### SCOPE

Section 61 includes everything to do with the anatomy, physiology, pathology, etc., of the human body and also comparatively those of animals; further, the avoidance of illnesses and accidents (hygiene, public health, accident prevention) and therapeutics (pharmacology, practical pharmacy, materia medica and toxicology). It should be noted that a series of subjects important to medicine come in the sections 56 Palaeontology, 57 Biological sciences, 58 Botany and 59 Zoology. In classifying the literature those sections should also be taken into account; in many cases special reference is made to them in subsections of 61.

### PRINCIPLES OF DIVISION

Section 611 Anatomy, especially 611.1/.8 Systematic anatomy, is particularly important (see the introductory remarks to the section 611). The subsections of 61 correspond as far as possible with each other, especially 612.1/.8 Systematic physiology and 616.1/.8 Special pathology.

If a publication deals with aspects of the anatomy, physiology and pathology of specific parts of the body, it should be placed in the appropriate part of 616; it is recommended, however, that references should be made to the corresponding subsections of 611 and 612.

### Principal Divisions

611 Anatomy	616 Pathology
612 Physiology	617 Orthopaedics. Surgery. Ophthalmology
613 Hygiene	618 Gynaecology. Obstetrics
614 Public health. Accident prevention	619 Comparative medicine. Veterinary medicine
615 Pharmaceutics. Therapeutics. Toxicology	

### NOTES ON AUXILIARY SIGNS AND SUBDIVISIONS\*

**Common auxiliaries.** The common auxiliaries of form (0...), of place (1/9), of time '...', and of language = are applicable throughout 61.

**Special auxiliaries.** In section 61 special auxiliaries are used to a great extent. These auxiliaries are developed in different ways for individual subsections and have correspondingly different meanings. They agree in part with the special auxiliaries of 5 Natural sciences.

The following synopsis explains the special auxiliaries developed in section 616 Pathology with -00 and -0.

616-001	Wounds	-01/-09	<i>General viewpoints in pathology</i>
-002	Inflammation. Irritation. Hyperaemia. Obstruction with mucus. Inflammatory irritation	-018	Histology
-003	Degenerative processes	-02	Aetiology
-004	Sclerosis. Induration	-03	Different forms of diseases, their treatment. Administration of medications
-005	Disturbances of circulation	-05	The patient (as a person)
-006	Tumours. Neoplasms. Blastomas. Choristomas. Haematomas. Oncology	-06	Complications
-007	Physical defects of development. Smallness or largeness of organs. Anomalies. Teratology. Chemical monsters	-07	Semiology. Symptomatology
-008	Disturbance of function, activity and resistance of organs	-08	Treatment
-009	Nervous disturbances	-091	Pathological anatomy
		-092	Pathological physiology. Pathogenesis
		-093/-098	Bacteriological and parasitological examination
		-099	Poisoning

\* The phrase 'auxiliary signs and subdivisions' is often abbreviated to 'auxiliaries'. Further information about the common auxiliary signs and subdivisions may be found in:  
 BS 1000A: 1961 'Universal Decimal Classification: Abridged English edition'. Contains tables of the auxiliaries and brief notes about their use as well as a general introduction to the UDC and an abridgement of the whole scheme.  
 BS 1000C: 1963 'Guide to the Universal Decimal Classification (UDC)'. Among other things, gives detailed information about the significance and use of the auxiliaries.

## Notes on UDC 613 Hygiene

### SCOPE

All questions of personal hygiene come under UDC 613. Public health, i.e. measures taken by official bodies to preserve the health of the population come under UDC 614.

#### Related Subjects

159.9	Psychology	685.6	Sports goods and equipment
313.1	Statistics of accidents and diseases and their results	685.7	Apparatus for climbing, mountaineering and swimming
649	Care of children and invalids in the home	687	Clothing industry. Toilet articles
656.072.65	Care of the health of passengers	796/799	Sport
668.5	Perfumery. Manufacture of cosmetics		

#### Note on Special Auxiliaries

The special auxiliary subdivisions -0 of the section 616 and .07/.08 of the section 35 are applicable here.

### EXPLANATION OF OTHER SYMBOLS USED IN THE SCHEDULE

The arrow → is used to mean either 'see' or 'see also' according to the content and form of reference.

### Principal Divisions

- 613.1 **CLIMATIC EFFECTS**  
*Subdivide further by colon to the subdivisions of 551.5 Meteorology*  
→615.834 Climatotherapy. Air cures, therapeutics  
→616-054 Anthropological pathology
- .11 Adaptation to climate. Acclimatization
- .12 Healthy and unhealthy climates. Mountains. Coasts. Country and town  
*Subdivide by means of the common auxiliaries of place, e.g.*  
613.12(23) Mountain climate  
613.12(285.3) Swamp microclimate
- .13 Seasonal and diurnal periods
- .14 Need for air. Amount of air required in confined spaces
- .15 Air conditions  
→612.014.464 Action of oxygen, ozone, air  
→614.71 Hygiene of the air
- .155 Air in confined spaces
- .3 Injurious concentrations of gases and vapours
- .157 Smells  
→614.718 Smells. Miasmas. Substances causing disease
- 613.16 **Physical effects**
- .161 Movement of air
- .162 Humidity and dryness
- .163 Atmospheric pressure  
→612.014.41 Effects of atmospheric pressure  
→612.275.11 Mountain sickness. Aviation sickness  
→616-001.11 Caisson disease. Effects of high atmospheric pressure  
→616-001.12 Effects of low atmospheric pressure
- .164 Sounds. Noises  
→612.014.45 Effect of sounds and vibrations  
→613.644 Vibration. Sound waves
- .165 Light  
→612.014.44 Effect of light  
→616-001.14 General effects of light  
→616-001.15 Local effects of light
- .2 Sunlight
- .6 Ultra-violet and infra-red rays
- .9 Darkness
- .166 Heat  
→551.5 Meteorology  
→612.014.43 Effect of heat and cold  
→616-001.16 Heat stroke  
→616-001.17 Burning
- .9 Cold  
→551.5 Meteorology  
→612.014.43 Effect of heat and cold  
→616-001.18 General effect of cold  
→616-001.19 Localized effect of cold
- .167 Electricity  
→612.014.424 Action of electricity on organisms  
→616.001.21 General effect of electricity  
→616-001.22 Localized effect of electricity
- 613.167.4 Electrical conditions of the atmosphere  
.168 Magnetism. Electromagnetism  
→612.014.426 Effects of magnetism
- 613.2 **HYGIENE OF NUTRITION. DIET**  
→612.39 Nutrition  
→614.31 Inspection of food  
→615.24 Drugs acting on the digestive system  
→616-083 Hygiene of the sick  
→641 Food. Cooking  
→663 Beverages, stimulants  
→664 Food industries
- .2-032 Feeding by special methods  
:611.33 Feeding per gastrostomy  
:611.343 Feeding per jejunostomy  
:611.35 Feeding per rectum
- 058 Conditions of nutrition according to social class  
*Subdivide as 616-058*
- 099 Food poisoning
- 613.21 **Meals. Number. Time. Periods between meals**
- .22 Nutrition of children  
.221 Nutrition of infants  
→613.287 Milk  
→613.95 Hygiene of children  
→649.3 Feeding of children  
→612.391 Hunger. Thirst. Inanition  
→616.393 Inanition, pathology
- .25 Overeating. Obesity. Cures for obesity  
-032:611.33 Forced feeding by stomach tube
- 613.26 **Plant foods**  
→612.392.7 Plant foods
- .261 Vegetarianism  
→612.392.71 Vegetarianism
- .262 Fruit. Vegetables. Roots  
*Subdivide by colon to the subdivisions of 63 Agriculture*  
→612.392.72 Fruits. Vegetables  
→641.13 Fruits. Vegetables
- .263 Starchy foods. Carbohydrates  
*Subdivide by colon to the subdivisions of 63 Agriculture and 664 Food industries*  
→612.392.73 Farinaceous foods
- .268 Vegetable oils and fats  
*Subdivide by colon to the subdivisions of 664 Food industries and 665 Oils and fats*  
→613.288 Fats. Fat-containing foods
- .269 Conserves of vegetables and fruit  
*Subdivide by colon to the subdivisions of 664 Food industries*
- 613.27 **Mineral food constituents**  
*Subdivide by colon to the subdivisions of 546 Inorganic chemistry*  
→612.392.6 Mineral salts
- 613.28 **Foods of animal origin**  
*Subdivide by colon to the subdivisions of 636 Animal husbandry and 637 Dairy and other animal produce*

## P NOTES AND EXTENSIONS TO THE UDC

P Notes are lists of proposed extensions, modifications and corrections to the UDC and are issued by the International Federation for Documentation (FID) as working documents for circulation to active participants in the development and revision of the UDC. They appear irregularly with text variously in English, French or German.

Extensions and corrections to the UDC (FID No. 248) are one of the most authoritative services to users of the UDC and take the form of half-yearly lists consisting of all P Notes, issued within a previous six-month period, which have been authorized. Each issue incorporates and supersedes the preceding one(s) in the same series, a series comprising six issues and covering a period of three years. The contents are arranged cumulatively in order of UDC number, i.e. beginning with the common auxiliaries and ending with the final subdivisions of class 9, with text variously in English, French or German.

Copies of the final issues (No. 6) of earlier series are still obtainable as follows:

- Ser. 1: No. 6 (Feb. 1954) for period Aug. 1949–Dec. 1952 (P Notes 411–520).
- Ser. 2: No. 6 (July 1956) for period Jan. 1953–Dec. 1955 (P Notes 521–597).
- Ser. 3: No. 6 (July 1959) for period Jan. 1956–Dec. 1958 (P Notes 598–658).
- Ser. 4: No. 6 (Aug. 1962) for period Jan. 1959–Dec. 1961 (P Notes 659–764).
- Ser. 5: No. 6 (Sep. 1965) for period Jan. 1962–Dec. 1964 (P Notes 765–826).

The latest issue is:

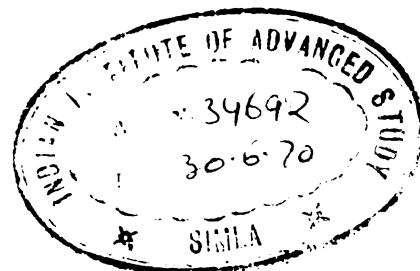

- Ser. 6: No. 4 (Sep. 1967) for period Jan. 1965–June 1967 (P Notes 827–874).

The above series enable users to update their editions of the UDC but oblige them to purchase the Extensions to all classes of the UDC even though they may have only special subject interests.

The recently published FID No. 420 Cumulated UDC Supplement (1964) will partially meet the requirements of users with limited special subject interests. It includes all the matter from the first five series of the Extensions and corrections to the UDC, i.e. P Notes up to P826, December, 1964, together with that from the Ergangungen (1951) supplementing the German full edition completed in 1948, intercolated and cumulated in six separate volumes for the following classes, divisions and sections of the UDC, with text variously in English, French or German:

- Vol. I: UDC 0/3; Vol. II: UDC 5/61; Vol. III: UDC 62/621;
- Vol. IV: UDC 622/65; Vol. V: UDC 66/68; Vol. VI: UDC 69/9 and common auxiliaries.

It will be appreciated that the users with general subject interests will still need the Extensions and corrections to the UDC, whilst even those with special subject interests will need the latest issue of Series 6 if they wish to keep up to date as it is not proposed to issue a further Cumulated UDC Supplement in the near future.
