GLOBE ECONOMIC PLAN - 1999

(A Project of Economic Science)

PREAMBLE : - Economics has a history of 2500 years and more. Mahaveera proclaims " **LIVE AND LET LIVE**" He gives a guide line for man to live by his 5 principles. Since then economics crawls and grows. Eric Roll and P.N. Hajela give a vivid description of the history. But here I am not going to give all the details. But a little of its as concern to the subject.

LIBERAL COMRADE

Today it is Friday, January 1st, 1999. Today we can declare that world in the small families of 185 nations, big, small and great. But in 1899 we could not have dare tell. This the time, that is responsible.

In this community of 185 nations, there Kings, Queens and Emperors. There are Prime Ministers, Presidents and Chancellors. In the Island, Islanders Live, in the

hill tribe people live, in the forest, foresters live. What is the common name we give all of these ? Fellowmen, Comrade or World citizen.

Now what is the future of an economic man ? In this world of ours, there are men. There is no economic man. Man loves to live in society. If he gets a golden opportunity to live, he claims, he can live like fellowmen. He wants to contribute and give something for the others. This is the spirit of mind or others above the same. Jungle thief Veerappan threatens 5 intellectuals with all liberality. In the marriage reception or the factory day, we can see a true nature of man how liberal we will be. Economics life strain and stress of life, money weight makes man conservative. This is the problem before the economic science.

Economic times gives its policy, the war cry, economic freedom of man. It is a family of husband and wife, and a child. Autonomy of family means economic freedom of all its members. In the autonomy of the village, economic freedom of family is ensured. In the autonomous nation economic freedom of villagers protected in the autonomus world, economic freedom of all the 185 nations is taken care of. Economic Freedom of 8 billions is to be protected.

According to Bapuji - man is a centre of the autonomus family. Next he is the village circle. They are concentric circle, each protecting the other. This is the picture before big economic circle.

It is the KARMA BHUMI each man takes up a production, a service or a trade. To have, one it is his birth right. The man can bill his product or service. Economic times has to see, it is its trust.

Circle have 360° degree a sphere has one lakh eight hundred 100800 degree flow many degrees has economics. Just today eight hundred crores and three child is born in a ship. Economic times has 8000000003 eyes. Economics has one eye. So is faulters. This thousands eyes economic science tries to see, tries to give comprehensive view of mans life tiny world of 185 nations, a globe 8 billion people

DEVASTING INFLATION

Inflation is the trend of ever increasing prices. It stimulates the economy around. But while one grows to ten, hundred grows to lakhs, and lakhs grows to billion. The disparity of income aggravated and activities of the higher income holders stagnet the lower income group. Exploitation grows faster. Human

values is devalued. Money and money making makes the social life unbearable and suffocating

Since 1940 inflation trend is increasing, by this inflation. Black money holders grow fast. Spread every where and turn every field into their own activities. Next group that is stimulated is the official bureaucracy. They are well secured. Five year plan adds fuel. And they are insisting and exacting. This PWD No.1 illustrates in the state.

This cross road, village road joins the highway, sandy is there right above. The slope is one to five. Its is April 15th. The road stop is ordered. Three cuts are made humping is well shaped. Lorries would stop, rise and drop rise, and slide the way. Now it is May 15th lumping is no plan budget gets distributed.

It is at this time political leaders join the fray. They announce that Ministers could work on two hundred rupees a month. But the time has changed. They enjoyed the chair crores of money passes through their hand. Well wishers surround them. Now money and money making is the rule.

Political leaders and official bureaucracy join together, and fold the public at ransom.

It is a natural havoc. Centre arrange 27 air flights But only one is to the spot. In the railway at the time of an accident out of 29 flights not even one to the spot.

A Ministers costs four lakhs to the public finance, 2.5 lakhs is for journey. But Ministers knows no loss. He draws 4.8 lakhs.

Our M.Ps are a privileged Class. They have free passes. Two crore plan budget is at their disposal. They will have monthly gas cylinder allotment. Kerela High Court issues a stay order. M.Ps are angry. They denounce judiciary is going beyond its limit. The anger proves their guilt.

Cabinet Minister announcer quarrelled for the budget allotment. A Chief Minister announcer he has given 22 thousand crores plan budget to the Deputy Chief Minister. Yet grumbles. M.Ps turn king maker. In Arunachala new ministry is formed Out of sixty there are 30 Ministers. There are Arunachala Congress (I), Arunachala Congress (M) and Arunachala (D). If he recall what is the money pull behind we get a full picture of the havoc.

In Goa it is budget. But a speaker announced with

deep voice The opposition leader and himself have formed a new front. The ministry is loss. Assembly is postponed.

This is inflation and money rush. We are in a abnormal situation of unrest, and suffocating. How to set it normal is a major economic problem. Can our economic scientist answer it?

CHAPTER - 3

HIMALAYAN GROWTH OF AMERICAN CAPITAL

J.R. Common describes American capitalism as **BANKER'S CAPITALISM**. This is hundred years of boom and progress has made them grow, from millions to billions, billions to thousand billions and thousand billions to billions of billions. They sustain the growth. They appoint Doctors, Engineers, Scientist and Experts. These intellectuals are just the employees. They are absentee managers.

How much American capital has grown in these hundred year ? One cannot imagine the extent of this growth.

Two joint firms have recently amalgamated into a single firm. Their capital investment is 184 billions. Their bonus is 30%. Every month they accumulate 5.5 billions. Where to invest it? How to make use of it. They may either go to purchase a Himalayan range build to the air conditional offices open globe distribution of ice cream.

In this total world investment American investment is 48% in the American share is 35%. Out of the ten noble prizes of 1998, six (6) goes to America.

This progress has not turned. Their heads otherwise. They maintain two party system and maintain political stability. But in India 60 years of Independence and inflation has made our leaders lose their identity. They are power drunk and money mad. They talk secularism. But Congress divides two Congress - I, Congress - II, Congress - 16, Manipur Congress (T) Manipur Congress (M). Every party is a caste and treat others as out castes. They have no morality, and sanctity, to elect a leader and work under him. Mother India is nothing to them.

India declares three atomic tests. Later it declares two more tests one completed. India is an

atomic power. They need no more tests. America is taken a back. How could it have no free sense of it. The President sanction against India. Three hundred firms are black listed.

America is Pro - America. Even one who chase he is pro-Indian, he want to make India Pro-America.

There is a joke. President has power to sanction against, certainly he can remove the sanction. But senators pass the resolution - permitting the President to remove the sanction. This is a psychological war against India.

America has noted from every beginning that - India can be a challenge in many fields. So it swallows many bitter pills, as far as Pakistan is concern. Pakistan can fight an America war with India. America and Cuba relation, America- Israel, America & China relation illustrate it.

American growth, if growth of nose to over take of the right eye of India American Himalayan growth may take off, vital sunshine for many countries, how can we meet this economic challenge. Can U.N.O. answer this problem?

4. GUIDING PRINCIPLES

Demand for and supply of a commodity tends to take its market price to its normal price. At this normal price all the factors would get the maximum regard. Then why should there be a government? Do the government's in the way of supply, demand and normal price?

Capitalists assert it is a world market, a free market an open market, competitive market. The production cost of a commodity has no relevance to its market price. It is the results of supply and demand. This is wolf's advice to the Lamb. According to a report of AKASHAVANI in the case of a Soap its cost price Rs. 1.40 but it is sold at Rs. 5.00. This is neither production nor distribution, but it is exploitation.

Demand and supply analysis is for wages also, wages increase, labourers increase, then wages fall, then labourers decrease. Then wages normalises, wages to rare the labour.

Here is a fallacy with increase wages he may not go for more children. Even so, to get a child it

is a year and for him to grow another eighteen years, for these nineteen years (19) can this be static?

Demand and supply is also applied for international trade. Currencies exchange at the rate of inverse ration of their purchasing power. Even in the case of an individual his inpayments and expayment will not be equal at any point of time. Then how can be expect a nation to have exports and import equal to with 100 of nations ? Then to cut the exchange rate to set it right it is to cut the nose to cut cold. We have to arrange better.

In the case of quantity theory of money, money is supplied, prices increase. This quantity of money is evasive. It mises under current of black money. Even on an account of drug tropic it is said it amounts to five hundred billion. There is barter trade is omitted, financial institution practice WINDOW WASHING. They maintain duel accounts. They how can we relay on this theory ?

Keynes multiplier formula, his flow of expenditure and income is realistic. But have we analysed ? and we cannot achieve, non inflatory nor diflatory economy.

We can go step further. It is not money nor capital but it is the capitalist that is responsible for the current tendencies. If we can delink the link of capital and capitalist, it is Decapital or community capital. This capitalist ASANGRAH APARIGRAHA, it is trust money we are the trustees. It is SAMPATHDHAN, to Basaveshwara, it is Kayaka. We are yet to realise economic scope of this concept.

It is community capital. Organiser is at par. They give the price formula, ISI formula. 10% goes to the capital account. The bank is the cash book. This team work will create a new era.

Indian government wants to hand over its Hotel Bharath to the Private sector. In the public sector it is top heavy. If it is private capital it is profiting. In case of capital (foreign) it is exploiting, we can as well call it as community capital. Then they give their price formula. Here pay of labourer semi skilled labourer and skilled labourer it agreed to be in the ratio of 1:2:3, out of the total yield 10% goes to the capital account. They maintain a standard of service and thereby they can lead the market. They become financially self sufficient They can hop one institution every couple of years.

i) **BIRTH OF A CHILD** : - It is the beginning of a new problem considering the pressure of population on nature. One family can effort to have only a child. Child care 0 to 5 and mother care is a must. Mother can have a year of leave to take care of her child. This is a mother's claim.

ii) Education adopt the child for the community, a child is the property of education, child is the subject, teacher school and parents are instrumental. A child should get all the necessary equipment. It studies 3 languages, 3 subjects and physical education, yoga and sports and environment. Education is examination free, only a test to measure the growth. A child should get a prescribe minimum in five of these studies. In case it falls short, by two month regorus camp, it may come to the level. We must develop a sence of shame in a child to attend the camp to go to the next class.

This school is the second home. The children being with their parents may attend the class. They are given a lunch and a meal in a day on their choice. Student may camp in the school itself. They are given night meal. They have the benefit of group study and self examination.

For every hundred students there will be a house master. We must see, that the students are tobacco free and drink and drug free. We must build a character and a citizen in him.

iii) Youth service before our young men and young women we may set a hard task. A University forever faculty, university of agriculture, university of sports, military and police. University provides training, it take research. It provide services, observing all the officials, if there are 10 students we may set before them some twelve channel one may chose his choice but he has to work hard and he sure of his reward.

iii(a) If a young women, aged 20, choses to marry she can cliam the benefit of rehabilitation.

iv) DEATH : In this weightless economy death has no shadow only sure his sons and family will looked after by the village, because it is an autonomous village ensuring infividual economic freedom.

In the case of an organisers death, it is community capital investment, the firm continues

proper legal provision is necessary.

Aouranga Zeb is dead, if there is one to keep the empire in fact, there would have been no Birth and French to play the trick.

This is community capital investment. Men may go and men may come, it goes on forever. Financially it is self sufficient with 10% or even 20% to the capital account, it can hop itself. Every year to a group of people or a village and embrace them to this economic adult hood. This is economic planning of goble growth and development

5. A POLITICAL PROJECT, A CAPITAL PROJECT AND AN ECONOMIC PROJECT.

Public distribution system to provide food grains at subsidised rate to the people below the poverty line at a cost of Rs. 8,000 crores is a typical political plan. 8000 crores is taken away from productive investment, it is negative and diflatory. The same amount is spent on consumption is a through away. This is economically a blunder. This makes us

beggars, as baggers we remain can't this be utilised for betterment of same people ?

In contrast with to this, community capital investment project answers better. It is a community diary project, It can be taken in any marginal village or group at cost of 4 lakhs. A modern cowshed for 10 cows with a sales window and a refrigerator, 12 women are engaged at 600 Rs. per a month. They are self employees. Initially taken on the scale as may look ashence at the project. They are trained now they are experts. They can sell the milk at Rs. 8 curds at Rs. 10 Kova at Rs. 50 and peda at Rs 70.

A government official residence at the village, is appointed as the project officer to see it is a community investment and as such it is maintained.

We can have 3 sub plans - 1) We can have 3 public gobar gas plants with two flushouts attached to each. Thereby 30 families can have the benefit of a lavratory.

2) 30 families can have the benefit of kitchen gas.

3) We can have 30 composts, we can feed them with weeds and herbs including parthenium. The out flow of the gobar gas plant is poured upon. This dissolves them with seeds and all the manure is soft like wax. It is five times richer. Farmers could get it at Rs. 50 per a quintal. This provides good employment for 12 more people.

10% of the yield goes to the capital account. This floats the economy of the village, by 80000 crores we can have the two lakhs projects in 200 camps, with 50% bank assistance it can be 4 lakhs. These are financially self sufficient and each one can adopt another village in a year. Thus the community capital investment project eliminates the poverty in 5 year plan.

II. The present co-operative dairy is typically a capital project, to run a milk train from Bombay to Culcutta is capitalistic by written what this could do from Bangalore mother dairy, Bangalore dairy, Kolar dairy, Tumkur dairy jointly send milk to Culcutta twice a week. They propose to have milk plant with an outlay of 50 crores. They propose to have milk powder plant with an outlay of 50 crores. They pay 2 Rs. a ltr to carry it from what a wasteful project ?

Milk is collected from individuals but can't the milk be used this itself and the benefit goes to the village in contrast community dairy is a community capital investment project.

III. Agriculture could be a community capital investment project for every 1000 hectares. The agriculture university may provide a project officer, he plans the project and government provides 30% seed money only once to begin with. Farmers may contribute a little with that amount in the bank the project officer can go with his project.

The Project Officer takes for personal cultivation and development all the public lands - government lands, temple lands, school lands and boodan lands.

Water is to be utilised in full, drip irrigation is adopted. He can directly place the orders for the equipments on his own Investment pays.

The Project Officer can take care of seed service, manure service, water service and disinfectants service. Farmers are paid for their service on a month. It can have a community store room, cost is worked out, village requirement is stocked and the rest is marketed.

Out of total yield 10% goes to the capital account or community account. It goes to the project officer. The Project Officer can claim this is the harvest and this my reward.

This is what community capital investment project means revenue department to the income department are the old relics. We may as well do away with. The community projects and 10% Yield can look after all the public expenditure.

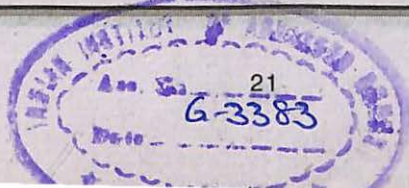

6. AT U.N.O. LEVEL

i) Globle weightless economy is the economy with no money weight. It is the economy, non inflatory and non deflatory. We live in a society, apart from the community we have no existence, there are different people with different incomes with inflation on, over growth on one in comparison to the others is cancer growth. It is exacting and exploiting. Among 185 nations only eight are advance. Ameican overgrowth is over shadowing, other growing nations. How can we normalise it. We have to go from the money economy to the credit economy, it is the community financing on the behalf of the community. The supply of money and

credit is arranged.

By a resolution U.N.O. can establish the world monetary authority in the world bank. It is not a share holders bank. It does not depend on gold, it has no capital of its own, but it represents all the central banks and it is the bank of the central banks and it is the bank of the central banks. Central bank is the national monetary authority and it is the bank of all the commercial bank, liquidates the iron fist of money. Dollars, Rupees and Yens are equally strong. Exchange rate is maintained the same by the world bank, dollar bill of America can be paid in rupees in India. The central bank forwards the paid of bill and the rupee check to the world bank. The world bank in its turn keeps it itself the Rupee check passes on the dollar check.

The World bank is the pools to which there are inflows and out flows of all the currencies, it is a system if the out flow is shorts world bank makes it up, if the inflow is short it can supply. It with 100 family camp a consumer centre, two merchant man it. The Commercial Bank its the bank of these merchants. This is globe credit economy which can supply on behalf of the world community finance all the bonafied economic activities.

ii) The world university of planning science and technology this can plan for the nations. It can utilise the best technology available. There need be no duplication of research work.

It can arrange the community capital for the same. Economics is the science of planning, science of domestic management and state craft.

The university can convert the multi national into the different national units. It constitute International Standard Institute which can issue the certificate for all the national units, prescribing the standard and the rate to the scientist research is in harmony with nature for the university it is in co-operation and co-ordination. Competition has no place in the planned economy.

It organises the globe pilots air service. All the capital investments in the aerodroms are the community capital for air service. They are trained and they know their job. They can maintain the safety service. They can settle where the aerodroms to be and from where the Helicopter service could be arranged.

The World doctors and paramedical service could be organised. It is the doctors that are in-

charge and investment is the medical service investment by this arrangement, with 5 cm robots and a T.V. set. With a computer a trainers can give the heart surgery in the patients room in its own house and it is the doctors abroad. In heart transplantation and in brain surgery is the best service could be made available world wide at a doctors bill. Here we may recall. The remark of the doctor in-charge of heart specialist conference in India, what nursing institution charge is 4 times what is costs. Here the capitalist are completely eliminated.

This scientists organisation and the engineers organisation can take up what the planning is and where it is to be concept rated. This is globe planning by the experts with the community capital back up.

iii) The high see observation unit and sea bed mining operations could be organised by the U.N.O. can take charge of all this space experiments and it can clean the space of the rubbish. We are feeling it. The U.N.O. can take charge of all the atom bomb units and mass destruction weapons and arrange the same nations to be in charge.

iv) It is world financing system and only

bonafied activities can get the necessary plan and capital. There can be no drug traffic. There can be no transfer of deadly weapons. This terrorist can find no shelter wherever they go.

v) The U.N.O. arranges and runs all the refugee camps. It provides refugee children the best education possible. It can give them the world citizenship.

vi) For the trouble spots say Afghanistan, Israel and Palasthene and Congo troubled areas planned economy. The political boundaries are eventually made of no material consequents. They become unified and play practical role of the planned economy.

7. AT THE NATIONAL LEVEL

i) Parliament can provide a stable government. Illusion about the majority concept may be cleared. In case of 70% voting and a party getting 70% seats. It obtains only 49% of votes. Out of the population only 60% are eligible voters, with 80% voting it has only the backing of 48% of the population. Therefore, it is a majority government,

it is collapsed as little bearing.

Indian constitution is the best. Only a certain convention may be adopted to ensure a stable government. The biggest party elects its leader A, bigger party B, the big party C and let there be C, D, E, F being the leader of the Independence. They meet the PRESIDENT IN COUNCIL. It is part of the parliamentary procedure. Its conclusion is legally binding. A be the P. M. is the speaker and C the opposition leader. It is obligatory on their part to rule the India for its full term. Opposition leader may form a shadow government with D and E groups. They attend the ministries meetings as observers. Opposition leader can order on behalf of this shadow government for an enquiry on any topic.

Vague assertion such as government has collapsed, there is no law and order. It is antipeople such statement should be filed before the Chief Justice for a review and instructions.

ii) Surplus budget are deficit budget is to be understood clearly. The deficit budget leads to inflation is not correct.

In kamataka 40 crores are spent to give bonus

to the employees of transport corporation. This is certainly inflationary. If by a deficit finance, 100 new buses are introduced it pays from the very day. Therefore a government can easily go for 10% to 20% deficit finance by treasury bills and earmarket for :- a) to introduce drip irrigation in the area. b) 30% seed money for any commercial bank introducing itself a community capital investment project, such as community dairy which is financially self supporting.

iii) University of youth service military and police service.

Now a days demartation between military and police jurisdiction is very thin. Terrorists activities with automatic weapons and bombs, pilotless plains, makes it is the military that can observe and eliminate. Therefore in any every district one observation post of any services be organised. In the international border the company of dogs be adopted. The service chiefs can halt for a week in turns and see that there will be no infliration.

Every year a youths camp be organised for sports and athletes. Any one who achieves a national record be considered as unletter graduate. He or

homeguard group or Balika group. They can a VYAYAMA SHALA providing facilities for physical exercises and yogasanas. They are alerted look after environment, hospital, stations with a specified points to observe and report. They can visit the different officers and get a proforma on their working and attendance.

A women graduate welfare officer be appointed in every police outpost. The lockup is under her charge. She takes care of human rights and maintained all actions are with in the limits of law. Any women with her child if any can seek shelter and rehabilitation, her husband or his parents have to prove to the court that they are not guilty in case of a complaint.

iv) A house building unit :

An Engineer can organise a public work units with same fifty (50) workers, some 6 carpenters can have a depo and they can work and supply all the wooden materials with their specified rates. Necessary provision be made to have wood and other materials say some 10 iron and cement workers can attend to build cement mould and iron works at the specified rates.

Another 10 or 12 workers can take to provide cement bricks and hallow bricks as per the description by the K.R.S. Research centre. They can supply better compressed bricks and we save fuel to burn them.

With another group of mason work the Engineer take any project government or private with 30% advance, he can complete the work on a time bound manner and give charge of the building to the government or the private owner even if the bill is not cleared with all payments or through the bank. The bank can finance the entire amount till the bills are cleared It is the property of the bank and 12% interest be charged. The engineer is on his pay scale and 2% supervisory charge of the estimate, he can have in addition or he can have 5% as his share of the entire amount whichever is higher.

House building is land consuming, lands scares. Land under cultivation should be decreased. So in an assembly constituency area, considering it is a city, we may mark the land for house building and records. Planning is necessary even at the local construction work to have larger prospective.

Land under channels and under mud hills can

be reclaimed on channels on R.C.C. base hamlets of 10 houses could be built here and there; 1/5th of the mud hill may be raised 5 times and converted into a Bee park and children playground; 4/5th of the mud hill may be converted into coconut farm, mulberry farm and dairy farm.

v) At best the government is the planning agency. It has all the authority, all the knowhow, all the records at its disposal and can provide the seed money. Now the question is why should the government harp on an organiser to take up a project ? Why should we allow 5 projects registered 4 remain on the paper. ?

Subsidies, grant-in-aids, tax holiday free power and a guaranty. All these prove government is only an authority and it is not prepared to get to the people to provide the leadership and make the project a success.

The national finance, community capital investment, workers setup (if an entrepreneur wishes he may join the batch) works culture, the price formula as if by I.S.I. The project officer can see that the industry is setup. Internal risks may be

considered as cost and external risks insured. Then industry is a success. 10% of the yield goes to the community found out of which 1% goes to the project officer. He can be proud of his share of the project.

Insurance be the national finance. If it is institutional finance it only strengthens the hold of capital on the economy.

Planning commission may issue a single prospectus of L.I.C, G.I.C, I.D.B. Unit Trust and Postal Assurance. One policy holder may remit his premium in the local bank in the joint name of the village or block of his and himself on returns one payment officer in the district may sanction the benefit. This is credited to the account. The net amount provides the seed money for.

8. CLEAN ENVIRONMENT

Air pollution, water pollution, sound pollution barren land and space pollution - to have these clean and normal is a challenge of the century. All our activities are to be within the limits of 3 cycles

in nature - water cycle, Nitrogen cycle and oxygen cycle.

i) Public gobar gas plant for every 10 houses with 2 flushouts can provide them the use of lavatories. Kitchen gas could be provided with Dr. Mukharjee's gas pillows. We can have besides 5 compose pits we may feed them with weeds and herbs such as parthenium, when we pour they out flow, it dissolves them with seeds into manure soft like wax. It is 5 times richer. It enriches our land. Thus public gas plant is a master plant, which can maintain nitrogen balance in nature.

Even the underground sewage system only 75% to the pollution of water. It does not complete the cycle.

ii) We have borewells for water with solar pumps and overhead tank above and few trips for vegetables and green cultivation. 2 women can keep mosquito free and healthy.

iii) Open thanks and pools are a necessity to maintain ground water level. We may maintain them a miniature park; 2 gobar gas plants with 4 flush out each some vegetable and flower strips, we

may add even flower pots. 4 can keep it a clean spot for us for a evening resort.

iv) As for paddies field we may have drum feeder and rational system of days and dry days and thereby keep the mosquito area to a minimum

v) We may have roadside lawns for our cattle on bothsides for every 10 minute we may have forest and plant trees. In between for every metre we can have mulberry plant, sababul and fodder plant. We may allot some 50 trees to a landless family and 3000 plants to each of them. We may even water the roadside in summer to keep green.

Clean environment is a national problem. We have opted for no scavengers. Therefore environment department with N.C.C. & N.S.S. etc., to keep them clean. We may even clean our streets, divide them into perishable which goes to composepit, raw materials which goes to the industry and imperishable which we have to convert and a use them chemically, then investment pays itself and public health is our gain.

As regard slum water sinking pits, fish ponds and plasto convert and use it for cultivation.

As regard flood waters we may have preflood preparation, at the higher level, siphon mouse open which can suck the flood water and take it down 1 or 2 km to a sweet water ponds by this same devise we can protect our dams and bridges from the fury of floods.

9. CLEAN CITIES OUR DREAM

In early fifties, even in sixties to walk on the roads of Bangalore was a matter of joy and pride, to roam in the Lalbagh, on the tank bud to climb up the rock, to go to Kempegowda tower to taste groundnut is even now a green memory. In cool and moonly night to talk towards "National College" in K.R. Road and in the walks in twos and threes indulging with in ourself. On the environment has changed, crows have flown away. A citizen will get the benefit of lungs of a smoker, smoker who smokes ten cigarettes a day, how can we climb our city back ?

i) Every two wheeler be power run to help it for every 100 KM we may have a solar power battery charging centre, two self employees can supply the batteries whenever they need, they are power run, petrol is saved to that extent environment is cleaned.

ii) A white circle round the city, a red circle around it with in the white circle only city services can run, city buses, autos, cars, tempos, ooty tourist buses can have an entrance and only an exit for internal service. They have to take city services. Lorries could have a bypass only in the night from 9.00 p.m. to 5.00 a.m. as for as bus services are concerned. They can run only from one out streets to the other.

iii) As far as these vehicles are concerned, every single vehicle is in optimum unit. We may declare every vehicle in the property of road transport service. It is community capital investment for autos two self employees, four members for buses and lorries 4 self employees they are well trained they can run their vehicle for 16 hours a day. They give their vehicle for 16 hours a day. They give their price formula, pay bata, oil, petrol, to make sure there is no leaks or sucks there is independent booking agency,

out of this total yield 10% goes to the development fund otherwise what they earn is. There's every pie is remitted to the bank account and computer maintain a watch.

iv) For every 100 KM circle there will be a road transport project officer. He represent the government and the community. All the vehicles are under his review. He gives them a number, he allots them village wise or blockwise, benefit of investment should go to every village there shall be no over growth.

Road transport project officer determines where a workshop with spare parts be, where be a petrol bank, where a tourist canteen be, all are self employees, 10% of the yeild goes to the development fund. The Project Officer gets 1% he certainly shares the growth.

In case of petroleum hick, all internal risks are considered as cost, if necessary a separate portion be set apart and this development fund is subject to maintain the roads at this best. This is the national road transport plan.

v) For external risk they are insured, there will be a third party insurance. In case of an accident, the driver will have the moral courage to take the patient to the hospital he gives his report, advance insurance is sanctioned by the project officer.

In case of a tour programme, the driver will have a full sheet of programme from where to start, where to halt, where to get checked, on return he gives his form to the Project Officer. This sheet is sufficient for him to draw on the banks and the petrol bunks.

vi) The Project Officer and his vehicles as a team can have a watchful eye. Day and night on all lawful activities, nothing can miss their eyes, a drug, a bomb cannot get a hike. They are the watch dogs of the public roads.

vi-a) Road transport Project Officer may on his own initiative, may place an order for a transport service and introduce it where there is a need, there shall be no over crowding. A plank attach to a seat may be converted in to an additional sheets but they shall be no standing travellers.

10. RECALL AS A CALL

To a graduate of economic, statistics and mathematics, vague economic expression give rise to a multiple of questions demand and supply tend to give equilibrium prices but it is independent exchange set demand and supply normal. It is the independent exchange banking and marketing service. Here in bank is an institution of exchange encashing labour otherwise formed and makes exchange possible. This is the community finance to finance all economic activity.

This leads to an economy weightless, non-inflatory and non-deflatory. These thoughts and reflection are insisting and persisting and compelling.

In the early 70s I dream of many personalities, figures and persons. They usually appear between 2 a.m. and 4.30 a.m. I see the figure on a plank of 20cm x 100xm. Generally I see one personality at a time. They are 50 or 60 if not 100. Some are young, some are women, some are sitting on the chair, some are smiling, some are sublime, some are melancholy. One person appears from the dark at the

left hand corner, take a turn become bright and shining take down and up a round, take a return round and vanish into the darkness. I wish I could name them then they continue for six or more months. They never appear afterward, I recall them.

In the dream they speak to me. Some lines I hear them, at times in English they direct me so effectively. It is as late as in 1998, October 20 or 24, I hear these statement. It is Shanthinikethana School of economics, it asserts equilibrium prices are the results of not only demand and supply but also all other forces all other forces goes a long way. I could not make out what it is. I open my eyes, it is 4.50.

Since 1981 I am letter blind. I can not read. I can not write but, these reflections are compelling, many friends and well wishers come to my help. They read and write for me. They prepare the matter for the press. I recall them but for them this would not have come forth.

I recall the visit to Delhi last President of Soviet Union. I cannot forget his address to the parliament. He is the man who throws of president

power as of nothing and goes to the oblivion. He is the man of the century. How I wish he were an economist. To build the Soviet Union autonomous states, autonomous villages and ensure economic freedom of the individual. He could have built with the soviet might, A U.N.O. and a world economy of weightlessness.

I recall one Mahadevi Thayi Akka, her radio interview. She recalls Vinobhaji and bhudan of 6 lakhs acrea. She declines the thamrapathra her statements are, who are you to give ? Who am I to accept ? Kayaka is her faith, having services to the orphans is her pre-occupation at for the youth of 80 years.

This is my 55 years of work and endeavour, endeavour with faith and conviction and a mission.

This is the mission of economic science by its analysis incorporate and adopts into his hold, capitally sick projects socialistic plans, communistic programmes and objects of sarvodaya. Without entering into a controversy it takes up a projects of production; the best project, the best technology 20% seed money, 100% community capital investment; 10% of the

yield goes to the capital account, this is the growing point development.

It is a personal analysis not a functional They are one rupee member, 1 rupee entrance fees and membership fees, some 300 Rs. community capital investment. A is skilled, B is semiskilled, C is unskilled, In a common pay scale A starts from a level. Men may come and go. This financially self sufficient unit goes on forever.

Saving are individuals, investment is community capital investment. At the national level it is national investment. At the international level it is globe investment. There is growth, but not over growth. These is development but not cancerous development. This is mission of globe development economic plan. Please make this mission your own.

Shravanabelagola

Date : 12-5-1998

- Sub : 1. Rewive, Revise and recommend the project.
2. To Prescribe the price formula.

Pending banking reform, setting up a democratic world federal current with the world bank as the international monetary authority and central banks as the national authority and setting up a UNO University of Planning Science & Technology community dairy can as well be organised to rebuild our rural economy and market from the very base. Our 97-98 projects a Kannada copy enclosed, turns a paper plan for want of an authorised technical report letter to the Chief Consultant is hereby enclosed. He could not deliver the goods many many years efforts as come to a sad end can the commission take up this project and sponsor it ?

The building plan of the dairy is enclosed. Style can be got released and licence obtained. Please add 10 coes Rs....., a gas cylinder and a stove Rs....., a Refrigerator Rs....., some

furniture & vessels Rs....., and weight and measures Rs..... The commission may remind this project to the commercial bank with 20% seed money. This is sufficient support for us.

The environment department may sanction our village 3 public gobar gas plant, 10ft x 10ft public site 350 sqft fiber gas drum and flushout to the inset a drum on wheels and 12 gas pillows 100 cms 70cm x 70 cm with 15mm tubes with screw opener on either side.

By this public investment we can have

1. 12 women and 3 men on part time scale Rs. 600-10-660 9000Rs. a month.
2. 30 families to have public laveratories for this use. They have to use it clean, otherwise it could be locked.
3. 30 families to have a gas pillow a day at 3 Rs. a pillow.
4. They maintain 15 composite pit, feed it with weeds and herbs like parthenium and pour the out flow, it dissolves it seeds this seed free five times richer soft like manure at 100 Rs. quintal.
5. Dairy can supply 120 k milk at a day, 40 k milk at 8 Rs. 320 Rs. a day, 20 k milk curds, 200 Rs. a day, 20 k hot milk 400 Rs. per a day and 40

k milk yield 30 k peda at 1,800 Rs.

By this community investment consumers have 20% to 40% consumers surplus.

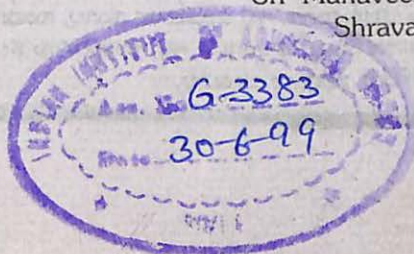

This is the property of the village as such we have to look after one resident official be named as a project officer. This 15 are the members, pay 1 Rs. entrance fee, 1 Rs. member fee, some 300 Rs towards the community capital, out of the total yield 10% goes to the development fund out of which it goes to the provident fund.

Respected Sir, This flows the village economy by this public investment we can hop a village a year we can build autonomous family in automomus group thereby we can take change all the marginal groupset trip.

Everest and after an economic analysis is enclosed for information this letter may kindly be acknowledge with respect to regard.

Yours faithfully,

(S.M. NEMIRAJ)

ವ್ಯವಸ್ಥಾಪಕ ಧರ್ಮಾಧಿಕಾರಿಗಳು
ಶ್ರೀ ಮಹಾವೀರ ಮಹಿಳಾ ಕೇಂದ್ರ
ನಾಗಯ್ಯನಕೊಪ್ಪಲು,
ಶ್ರವಣಬೆಳಗೊಳ - 573 135
ಚನ್ನರಾಯಪಟ್ಟಣ ತಾಲ್ಲೂಕು.

ಗೆ,

ಮ್ಯಾನೇಜರ್‌ರವರು
ಕೆನರಾ ಬೀಡ್ ಬ್ಯಾಂಕ್
ಹಾಸನ ಜಿಲ್ಲೆ, ಹಾಸನ.

ಸನ್ಮಾನ್ಯರೇ,

ವಿಷಯ : ಶ್ರೀ ಮಹಾವೀರ ಮಹಿಳಾ ಕೇಂದ್ರಕ್ಕೆ ಒಬ್ಬ ಪರಿಣಿತ
ನಾಯಕರನ್ನು ಒದಗಿಸುವುದು.

ಯೋಜನಾ ಆಯೋಗಗಳಿಗೆ ಕಳುಹಿಸಿದ ಪತ್ರವನ್ನು, 97-98ರ
ಕಾರ್ಯಕ್ರಮವನ್ನು ಮತ್ತು ಇಂಗ್ಲೀಷ್‌ನಲ್ಲಿ ಒಂದು ಅರ್ಥ ವಿಶ್ಲೇಷಣೆಯನ್ನು ತಮ್ಮ
ಅವಗಾಹನೆಗಾಗಿ ಕಳುಹಿಸುತ್ತಿದ್ದೇನೆ.

ಸಮುದಾಯವೆಂದರೆ ವಿಶ್ವ, ರಾಷ್ಟ್ರ ಗ್ರಾಮ. ಸಮುದಾಯದಲ್ಲಿ ಒಂದು
ಉತ್ಪಾದನೆಗೆ ಅಗತ್ಯವಾದ ಬಂಡವಾಳವನ್ನು ಸಮುದಾಯದ ಪರವಾಗಿ ಒದಗಿಸುವುದು
ಅಸಾಧ್ಯವೂ ಅಲ್ಲ, ಅಸಾಧ್ಯವೂ ಅಲ್ಲ, ಅಲ್ಲಿ ಕೆಲಸಗಾರ್ಹ ಸಂಘಟನೆ, ತಕ್ಕ ತರಬೇತಿ,
ಗ್ರಾಹಕರ ಕೇಂದ್ರ ಬ್ಯಾಂಕ್ ಕ್ಯಾಷ್ ಬುಕ್ ಜೊತೆಗೆ ತಜ್ಞರ ಬೆಲೆಯ ಸೂತ್ರ. ಇದು
ಸ್ವತಂತ್ರವಾದ ವಿನಿಮಯ. ಇದು ಉತ್ಪಾದನೆ ಗ್ರಾಹಕಗಳಿಗೆ, ಸೇವೆ ಪಾವತಿಗಳಿಗೆ ಮಧ್ಯ
ಇರಬೇಕಾದ ತಕ್ಕ ಶಾಸ್ತ್ರೀಯ ವ್ಯವಸ್ಥೆಯಾಗಿದೆ. ಇಲ್ಲಿ ಬಂಡವಾಳದ ಹಂಗಿಲ್ಲ, ಗುಂಪುಗಾರಿಕೆ
ಇಲ್ಲ, ಶೋಷಣೆಯಿಲ್ಲ, ಹಣದ ಉಬ್ಬರ ಅಬ್ಬರಗಳೂ ಇಲ್ಲ. ಉತ್ಪಾದನೆಯ ಶೇ. 10
ಅಭಿವೃದ್ಧಿ ನಿಧಿಗೆ ಎಂದರೆ ಬೇರೆ ತೆರಿಗೆಗಳೇ ಬೇಕಾಗಿಲ್ಲ.

ಶ್ರೀ ಮಹಾವೀರ ಮಹಿಳಾ ಕೇಂದ್ರವು ಸಮುದಾಯ ಬಂಡವಾಳದ ಒಂದು ಕಾರ್ಯಾಗಾರವಾಗಿ ಯೋಜಿಸಲ್ಪಟ್ಟಿದೆ. ಇದರ 3ನೇ ವರ್ಷದ ಕಾರ್ಯಕ್ರಮವನ್ನು ನೋಡಿ ಮಹಿಳಾ ನಿಯೋಗಕ್ಕೆ ಕಳುಹಿಸಿದ ನಮ್ಮ ಯೋಜನೆ ಮಧ್ಯದಲ್ಲಿ ಎಲ್ಲೆಯೋ ನಿಂತುಹೋಯಿತು ಆಗತ್ಯವಾದ ಅಧಿಕೃತ ತಾಂತ್ರಿಕ ವರದಿಯನ್ನು ಪಡೆಯಲಾಗಲಿಲ್ಲ. ಹೀಗಾಗಿ ಇವು ಕಾಗದದ ಮೇಲಿನ ಯೋಜನೆಗಳಾದವು. ನಮ್ಮ ಶಿಕ್ಷಕರು ಬೆಂಗಳೂರಿಗೆ ಹೊರಟು ಹೋದರು. ಕಳೆದ ಆಗಸ್ಟಿನಿಂದ ಯಂತ್ರಗಳ ಕೇಳುವವರಿಲ್ಲದಂತಾಗಿದೆ. ಯಂತ್ರಗಳು ಹಾಳಾಗಬಾರದೆಂದು ಅವುಗಳನ್ನು ಶೇಕಡ 50ರ ಬೆಲೆಯಲ್ಲಿ ಕೊಟ್ಟುಬಿಟ್ಟೆವು. ಅವು ಸೇರಿದವರಿಗೆ ಭರವಸೆಯಾಗಿವೆ ಎಂಬುದೇ ಸಂತೋಷ. ಬಟ್ಟೆಯನ್ನು ಶೇ. 10ರ ವಿನಾಯಿತಿಯಲ್ಲಿ ವಿಲೇವಾರಿ ಮಾಡುತ್ತಿದ್ದೇವೆ. ಈಗ ಕೇಂದ್ರದಲ್ಲಿ ಉಳಿದಿರುವುದು ಕೆಲವು ಪೀಠೋಪಕರಣಗಳು ಹಾಗೂ ಸಂಗ್ರಹಿಸಬೇಕಾದ 20,000 ರೂಗಳಿರು.

ಸನಾನ್ಯರೇ, ಈ ಕೇಂದ್ರಕ್ಕೆ ತಾವು ಒಬ್ಬ ಪರಿಣಿತ ನಾಯಕಿಯನ್ನು ಒದಗಿಸಬಹುದಾಗಿದೆ. ತಮ್ಮ ಬೆಂಗಳೂರು ಗ್ರಾಮಾಂತರದ ಹಾರೋಹಳ್ಳಿಯ ತರಬೇತಿ ಕೇಂದ್ರ ಉತ್ತಮ ತರಬೇತಿ ಒದಗಿಸುತ್ತಿದೆ. ಅವರು ಇಲ್ಲಿಗೆ ಸಿದ್ಧ ಉಡುಪುಗಳಲ್ಲಿ ಒಬ್ಬ ಪರಿಣಿತ ನಾಯಕಿಯರನ್ನು ಕಳುಹಿಸಬಹುದಾಗಿದೆ. ಅವರಿಗೆ ಉಚಿತ ವಸತಿ ಅವರು ಮೊದಲ ಹಂತದಲ್ಲಿ ಒಂದು ಯಂತ್ರ ಹಾಗೂ ಜಿಗ್‌ಜಾಗ್ ಯಂತ್ರವನ್ನು ಕೊಳ್ಳಬಹುದಾಗಿದೆ. ಅವರು ಬೇಕಾದ ಬಟ್ಟೆಯನ್ನು ಪಡೆಯಬಹುದು. ಅವರು ರೋಚಕವಾದ ಸಿದ್ಧಉಡುಪುಗಳನ್ನು ಮಾರುಕಟ್ಟೆಗೆ ಬಿಡಬಹುದು. ಕೆಲವರಿಗೆ ತರಬೇತಿಯನ್ನು ಕೊಡಬಹುದು. ಅವರ ಸಂಪಾದನೆ ಅವರಿಗೆ, ಶೇ. 10 ಅಭಿವೃದ್ಧಿ ನಿಧಿಗೆ.

ಇಂತಹ ಒಂದೆರಡು ಘಟಕಗಳು ಬೆಳೆದು ಬ್ಯಾಂಕುಗಳೊಡನೆ ಒಂದಕ್ಕೊಂದು ಸಂಬಂಧವನ್ನು ಬೆಳೆಸಿದರೆ ಅವು ಹಣಕಾಸಿನ ವಿಚಾರದಲ್ಲಿ ಸ್ವಯಂಪೂರ್ಣವಾಗುವುವು. ಅವು ಸಾಂಕ್ರಾಮಿಕವಾಗಿ ಗ್ರಾಮ ಗ್ರಾಮಾಂತರಗಳನ್ನು ಆವರಿಸುವುವು.

ಉದ್ಯೋಗ, ನಿಯೋಗದ ಶ್ರೀಯುತ ಕೌರ್‌ರವರು ಇದರ ಹೆಚ್ಚು ವಿವರಣೆಗಳನ್ನು ಕೊಡಬಲ್ಲರು. ಅವರು ಕಳೆದ ಸಾರಿ ನನ್ನ ಪರಿಚಯವನ್ನು ಮಾಡಿಕೊಟ್ಟಿದ್ದಾರೆ. ಇದು ತಮ್ಮ ಕೇಂದ್ರವೆಂದು ತಿಳಿದು ಬೆಳೆಸಬೇಕೆಂದು ಪ್ರಾರ್ಥಿಸುತ್ತೇನೆ.

ತುಂಬು ನಿರೀಕ್ಷೆಯಿಂದ ತಮ್ಮ ಉತ್ತರವನ್ನು ಕಾಯುತ್ತಿರುವ,

ಇಂತಿ ತಮ್ಮ ವಿಶ್ವಾಸಿ,

(ಎಸ್.ಎಂ. ನೇಮಿರಾಜ್)

IN THE CONTENTS

- I. Three Objects :
- i) Economic freedom of the individual.
 - ii) Autonomy of productive and service units, Village, Town and the Nation.
 - iii) Exploitation, free environment.
- II. Two Principles :
- i) Independent exchange, Banking and Marketing Services.
 - ii) Community Capital investment.
- III. First Step
- i) No Maladjustment - over grows and cancer development.
 - ii) Have and have not - No increase discrepancy Have not to be rehabilitated.
- IV. To concentrate Upon :
- i) Productive unit, community Capital, Works culture 10% yield to the capital account, the growing point of the economy.
 - ii) The planned economy less, noninflationary, non-deflationary.
