FOREWORD

This is the first volume of the bibliography series on Population Education to be prepared by the Population Education Cell of the National Council of Educational Research and Training. It is, therefore, by no means exhausted because more references are being collected.

Population Education as an integral part of education is gradually gaining recognition in the various States of the country, and in the recent All India Conference organised by the Population Education Cell on the implementation of the programme, the need of such a series was very strongly felt. The first volume was, therefore, quickly compiled and published. It is hoped that it will prove useful (may be as a starting point) to all persons interested in this programme. Other volumes will follow periodically.

In compiling we have taken the help of the following publications, for which we are very grateful to the persons concerned :—

1. Family Life and Population Education, National Institute of Family Planning, 1971.
2. Communication in Family Planning, Reports on Population/Family Planning, Population Council, April, 1971.
3. Draft Final Report : Regional Workshop on Population and Family Education, UNESCO, Bangkok, 1970.
4. Readings in Population Education, Population Education Cell, NCERT,
5. Population Education in School Curricula, Population Education Cell, NCERT.
