FORTHCOMING INTERNATIONAL
SCIENTIFIC AND TECHNICAL CONFERENCES.

LIST NO. 25 - JULY, 1959.

This list amends and amplifies the information contained in List No.24 which is superseded. As in the past, conferences have been given chronologically, and an index added to facilitate reference.

The aim of the list is to cover all scientific and technical conferences of an international character, held in the United Kingdom, or elsewhere, of interest to British Government Departments, British Government-supported research laboratories and other scientific organizations. The value of the list is further increased by the inclusion of a wide range of conferences such as annual general meetings of some of the professional institutions, which are often of two or three days' duration, and at which scientists from other countries might also be present.

In the main the conferences listed can be assumed to be open to suitably qualified scientists on payment of the usual membership fees. With few exceptions therefore no mention is made of meetings of commissions or committees of experts such as those organized by the Specialized Agencies of the United Nations. Moreover, these are listed by the United Nations Secretariat. Exhibitions are included when of particular scientific interest.

This opportunity is taken to thank the many readers who so kindly submit amendments and additions to these lists. It is hoped that they will continue, with others, to communicate further information to the Assistant Secretary, at the address below. It is only by such co-operation that the list can be made as comprehensive and useful as possible.
