

New valuation lists were published in December, 1955, and came into force on 1st April, 1956. An analysis of the new lists as first published showing the rateable values and numbers of hereditaments of different classes in each county, county borough and metropolitan borough, is given in a companion volume.*

A summary analysis of the new rateable values, with comparative figures for the old lists, was given in a White Paper, "Distribution of Rateable Values between different classes of property in England and Wales,"† presented to Parliament on 15th March, 1956.

* "Rates and Rateable Values in England and Wales." Supplement to the 1955-56 edition, showing the rateable values and numbers of hereditaments in the new valuation lists which came into force on 1st April, 1956. H.M.S.O., price 3s. 0d.

RATES AND RATEABLE VALUES IN ENGLAND AND WALES

This return is published annually. The present volume gives the rates levied for the financial year 1955-56 and the rateable values in force at the beginning of that year, and compares them with the figures published a year earlier. This material, with estimates of the yield *per capita* and of the products of a penny general rate in 1955-56, is given in the tables on pages 4 to 45 for each borough, urban district and rural district in England and Wales. It is summarised and re-examined from several aspects in the supplementary tables on pages 46 to 51. The last table on pages 52 to 60 gives a division of rateable values between industrial, freight-transport and other hereditaments as recorded in the valuation lists at April, 1955.

SOURCES OF THE FIGURES

The rate poundages are quoted from the local rate demand notes. The estimated product of a penny general rate (in which allowance has been made for costs of and losses on collection) is the advance estimate used by the rating authority in framing its demand notes. The entries in the last column of the tabulation on pages 4 to 45 and the corresponding items in the summaries on pages 46, 49 and 50 are based upon estimates, made by the rating authorities about the middle of the rating year, of the gross yield, subject to deduction only for discounts, allowances, voids and the like. The population figures used are from the Registrar-General's estimates for the 30th June, 1955, which include certain military and other special classes. The rateable values are supplied by the Valuation Officers of the Inland Revenue Department. The figures of receipts for the years 1937 to 1954 given in Table G on page 51 are from material supplied by local authorities for the Summary of Local Government Financial Statistics presented to Parliament annually.

RATES: ITEMS INCLUDED AND EXCLUDED

Contributions in lieu of rates paid from national funds for property occupied by or on behalf of the Crown for public purposes are included, but not the payments by transport and electricity authorities in lieu of the rates formerly paid for properties removed from the valuation lists in April, 1948, under Part V of the Local Government Act, 1948.

Water rates levied on consumers as such and rates levied by authorities other than the councils of the boroughs and county districts named in the tables (such as the rates levied by land drainage authorities or the conservators of rivers or commons or the trustees of London Squares) are excluded.

AVERAGE RATE POUNDAGE

A weighted average is implied: that is to say, in bringing together several rating areas in which different poundages are levied, weight is given to each according to its aggregate rateable value.

DIFFERENTIAL RATING

In London, certain garden or estate rates are sometimes levied by a metropolitan borough council as an addition, applicable only over a small area, to the general rate operating within the borough as a whole. Such items are omitted from Table A Part I (page 4) to avoid distortion.

Some provincial boroughs and urban districts (Table A Parts II and III, pages 5 to 30) comprise two or more differentially rated areas of substantial size. Here, the rate poundages quoted are those for the oldest or most central portion. Such cases are marked with an asterisk (*).

In rural districts the position is much more complex. The rate poundage commonly varies from parish to parish because of the differential incidence of special rates, additional items of the general rate, and parochial credits. To display the facts completely, both rates and rateable values would have to be set out parish by parish—an undertaking beyond the scope of this volume. The lay-out adopted (Table B, pages 31 to 45) shows, instead, the highest and lowest rates within each rural district and, for comparing one year with another, uses that part of the general rate which is constant from parish to parish.

RATES PER CAPITA

The high figures for the Cities of London and Westminster and the Borough of Holborn (Table A Part I, page 4) must be read with the knowledge that the calculations are based on the resident (i.e. the night) population. These three examples point to the general need for caution in drawing numerical comparisons between one place and another.

RATE FUND BALANCES

Rate poundages are influenced by provision made for or appropriations from rate fund balances: for this reason rate poundages in themselves are not a true measure of the trend of local expenditure.

RATE POUNDAGES, PENNY RATES, RATEABLE VALUES, RATES PER CAPITA

* Weighted average—see the note on page 3.

† "Rates" and "rating authorities" have the meanings given by the Rating and Valuation Act, 1925; that is to say the water rates, land drainage rates, etc., mentioned on page 3 are excluded.

‡ During these years rateable values and receipts from rates were substantially reduced by destruction of property and other wartime conditions.

§ In consequence of Part V of the Local Government Act, 1948, railway, canal and electricity hereditaments were derated as from 1st April, 1948. Payments in lieu of rates made by the British Transport Commission and the Central Electricity Authority are excluded from the table.

¶ Estimated from the latest information available at the time of publication.
