World Federation I
easured a lot. World
circular, I started in

A couple of issues
0. From 1930 to 1942,
n Japan and China
four years, 1942-1946,

due to war, it had to be stopped. Now it is
being regularly published in India since
November 1946. If I would have just collected
all the articles of all the past issues it could be
a very voluminous book, giving all the aspects
of our movement. But the general reader wants
a short continuous story or a clear description
of the programme. I have, therefore, written
this booklet, so that, you can see the plan at
a glance.

WORLD FEDERATION

Geography.

I propose that all the five continents will be self-governing provinces of the Federated World State.

The present formation of the United Nations, with big and small states of the world as members, is very defective. Weak and tiny States can not afford the expenses of maintaining their representatives in very expensive Newyork. Their circumstances force them to lean on some rich States. Naturally, therefore, the big powers and now specially the United States of America can have things in their own way! Justice is not done. Influence of power and wealth prevails in and out of the United Nations Organization.

I suggest that the principle should be accepted : Local liberty but all unity in World Federation.

The self-governing continental provinces should have some natural districts, which may again have self-governing localities.

I do not mean that these localities should be permanent for all times. They can be readjusted according to the convenience of the inhabitants.

Here I give the geography which I am advertising for last sixteen years atleast, if not a few years earlier.

I leave out the new names which I gave to continents, districts and capitals, they may create confusion.

In our plan, Asia, Europe, Africa, North America and South America will be five self governing provinces. Only in case of Arab and U. S. S. R., I have made an exception. I make Arab extend from Oman to Morocco, in two continents of Asia and Africa and U. S. S. R., including Turkey and Sinkiang, Turkish province of China, will belong to Asia as well as Europe.

The capital of Asia will be at Srinagar in Kashmir. Europe will have its capital at Geneve. African capital at Addis Ababa, North American capital at Los Angeles, and South America will have its capital at La Paz.

Kashmir, Switzerland, Ethopia, California and Bolivia will be called capital districts and will have autonomous governments.

Asia will be divided into the following three purely Asiatic districts : 1. Aryan, Iran to Assam; 2. Golden Land, Tibet to Japan; and 3. Golden Aryan, Burma to Philippines. U.S.S R. will be common to Asia and Europe and Arab will be common to Asia and Africa as already mentioned.

Aryan	capital	Karachi
Golden Land	capital	Tsingtao
Golden Aryan	capital	Bangkok
U. S. S. R.	capital	Tashkend
Arab	capital	Medina

Europe will be divided into three purely European districts: 1. Nordic includes Germany, Austria, Norway, Sweden, Danemark and Holland.

Note : England will have option either to join the Nordic District or join the North American Federation.

2. Latin includes France, Italy, Spain and Portugal.

3. Oriental extends from Finland to Greece.

The fourth district of U. S. S. R. will be represented in European government as well as that of Asia.

Latin	capital	Monaco
Nordic	capital	Copenhagen
Oriental	capital	Budapest.

Africa will be divided into three purely African districts: 1. Transvaal which will mean all South Africa. 2. Liberia, meaning all West Africa, including a part of Central Africa. 3. Ali which will include all East Africa with a part of Central Africa.

Arab will be common to Africa and Asia.

Liberia	capital	Monrovia
Transvaal	capital	Pretoria
Ali	capital	Zanzibar
Arab	capital	Madina

Note : I have also a suggestion to make Tanganjika the National home land of the Jews. It will function as an autonomous locality of Ali.

North America will be divided into three districts of 1. Canada, 2. United States and 3. Mexico, including West Indies and Central America.

Canada	capital	Vancouver
United States	capital	Washington
Mexico	capital	Mexico.

South America will be divided into three districts : 1. Brazil, 2. Argentine plus Chile and 3. Peru. Adjoining states federating with their neighbours.

Argentine, Brazil and Peru will have their capitals as at present.

Australia, Newzealand and Fiji islands, neighbouring islands with Hawaii islands will form Capital District...

The capital of the world will be at Honolulu.

Hawaii islands will be called the Heaven.

History.

Stories, traditions and mythology prove that different cycles of several civilizations flourished on this earth. There appear two main causes of the death of civilizations: deluge

or war. Babylonian story speaks of deluge and the Indian epoch of Mahabharat, meaning great war, shows that war destroyed the then prevailing civilization.

There is sufficient evidence to show that Egypt, Aryan and China were once three centres of civilization. Athens born of Egypt and Rome born of Athens and Constantinople born of Rome developed cultures of their own not so long ago.

Arabs and Mongolians spread out in Asia, Europe and Africa.

Recently Portuguese, Spaniards, Dutch, French and English went forth and colonised many lands.

Italians, Germans and Japanese tried to go out into the wide world but they were thwarted. The two world wars were caused by the move of their expansion and by counter moves.

Now Indians, Chinese, Japanese, Italians and Germans are multiplying but the entrenched Anglo-Saxons and the French hamper the natural growth of these peoples.

This is the story in short of the flow of blood.

Equally important is the growth of thought. Aryans of the ancient times developed Vedas and Sanscrit literature. Ancient Egyptian and Chinese thought disappeared long ago. Krishna, Buddha, Christ and Mohemmod gave to humanity certain thoughts which still guide tens of Millions of peoples. Moses, Kong-futsu and Shinto preachers of old, command still great respect among their followers.

Since Luther and the French revolution new currents of thought began to agitate the mind of Europe. And since a couple of Nations of Europe, mainly the English and the French, took possession of a very large portion of this earth, they brought about a revolutionary change in thinking of Russia, India, China and of many other nations.

Communism got hold of Russia, Sun Yat Sen's Kou Min Tang took China by a surprise and Mahatma Gandhi guided the Indian nation in her fight against the British imperialism.

Mustafa Kamal Pasha, Riza Shah Pahlvi, King Amanullah Khan and the local leaders of Arabia, Burma, Siam, Indo-China and Indonesia brought about great local changes in their localities.

In Americas Washington and Lincoln set the balls rolling of national freedom and of social emancipation.

In Japan, new Nippon consciousness arose and transformed the country within fifty years into a modern industrial State.

This is the history of the world in a nut shell.

Birth of World idea.

In a way it is extremely old. Indian ancient literature developed the idea of the family of the human race. Sheikh Sadi of mediaeval Iran said in a poem that peoples are parts of one body, if one people suffers others suffer too. Lord Tennyson sang of the Federation of the World in the last century. It was however the League of Nations founded in 1919 which laid the foundation of one world government. It broke down due to the monopoly created in it by the British and the French imperialists.

Second world war came. And again another version of the League of Nations rose in 1945, under the name of the United Nations.

Now the United States are practically monopolizing the United Nations. U. S. S. R. naturally objects to it. But the fear of communism, cunningly created by the United States and their supporters, makes most of the

States of the world follow America, supposed to be the protector of the "old order."

Under these circumstances our World Federation is the only hope of humanity.

I must state that I had, over caste and over province, liberal consciousness and I started my political life with the keen desire to free India from the British yoke. I joined the Germans and the Turks during the first world war with the hope of freeing India with their help. I cooperated with King Amanullah and Soviet Russia on a plan to push forward our freedom movement.

Coming to Japan in November 1922, I took up the idea of the Asiatic emancipation. I lectured on the unity of Asia and tried to organize pro Asia groups. In 1927 I attended the pan Asian Conference at Shanghai. It was decided that the next Asiatic Conference should be held at Cabul in Afghanistan and that I was to call it and do all the needful for its success.

Rebellion against King Amanullah held me up in Central Asia. I proceeded to Tehran with a view to hold the Asiatic Conference there. I met H. E. Minister Taimur Tash at Tehran. To my painful surprise he said that if he was to allow me to hold the Asiatic

conference at Tehrān. Europe will turn against Iran! It set me thinking and I decided that it was better to work for world federation.

I proceeded to Moscow. I was there the guest of the Afghanistan Ambassador. For several months I had to remain at Moscow. I wrote a book on world federation. Coming to Berlin I started the circular with the name of World Federation in September 1929. I had not money enough to publish the book myself. The ideas of the manuscript found room in the circular.

In 1930 a few numbers came out in the United States where I lectured on behalf of Afghanistan, inviting U. S. capital to that mountain locked land. I continued the publication in Japan, China and back in Japan.

In China and Japan I founded world federation clubs, opened offices and established World Federation Center at Kodairamura, Kokubunji within Tokyo metropolis boundary.

In 1935 I drew up the map of world federation, as described in our geography and proceeded to California and lectured on it.

I bitterly opposed the China policy of Japan. But I had my own very good Japanese friends.

In April 1942 the Japanese police interfered with the free publication of my circular and I stopped its publication.

On my arrival back in India in August 1946 I once again thought of continuing the circular. In November it was republished from Dehradun. Later its office was moved to Vrindaban from where it is coming out regularly every month and circulating the message of one world, world unity or federation of the world through out our earth.

Laws of Nature.

Laws of Nature work whether we know them or not. They work through us and through out the universe. I claim that though we have been rolling in the flood of time, forced to act in the process of life, yet we have not taken cognisance of the universal laws which rule us, guide us and correct us when we go astray.

We have been thinking in terms of this or that religion or sects, recently we have been thinking in terms of parties and we have been led blindly by the urge of race or nation, caste or tribe. We did not care to understand that individual, family, caste or tribe, nation or race, are just parts of the human race. We did not

go out of our belief to see that our beliefs are created in the interest of our tribes, nations, castes or races.

Every thought appears to satisfy some need. Thoughts clash when they do not realize that all over our earth groups of men live under different circumstances and they need different thoughts. Indeed, individuals differ too and they also need different thoughts. There are certain laws of Nature which make an individual take quite different stand when he or she hears some one preach a certain thought. We have to learn yet the causes of our likes and dislikes, fear, anger, and disruptive quarrels.

Our medicine has advanced a great deal in finding the microbes and poisons and anti poison serums but they did not pay sufficient attention to the blood currents forming races or thought currents which produced religions.

We should learn to analyse human thoughts. Thoughts which create disruption in society should be separated without any association of religion or party and should be replaced by harmony producing thoughts.

I assert if we would be sufficiently careful about the racial or national needs and would not unnecessarily annoy national or racial ego

we should easily succeed in suppressing disruptive thoughts.

It will be a science by itself, we shall work it out with the faith of a religion, we shall develop world consciousness, universal religion and the economic system of a joint family for all mankind.

We shall not ask people to live in dreams. We shall try to make every village or a part of a town, every school and factory, a joint family. This can be done immediately.

We should believe that the present cycle of civilization, about five thousand years old, has brought our human race, in this cycle, to the age of puberty. All the laws of Nature worked to make our race of age. We are suffering from some diseases which are usual at this age. We can either suddenly die, commit suicide, or live to venerable age.

If a friend gets sick, very sick, dangerously sick, we still try to cure him, we are duty bound to do what we can to cure the present political, religious, economic and social diseases of society. Nature itself wants it. Nature always tries to throw out harmful foreign matter from our bodies. Nature is working to help us to make further progress. Let us help

Nature too. Let us learn the Laws of Nature and act strictly obeying them.

Bands of Volunteers.

We need volunteers all round the world, in every nook and corner of our human society. We must remedy local ills and prepare communities to play their roles as parts of the human race. There are many groups in many different localities which are trying to unite the world. We find in the United Nations the greatest, organized, official institution, trying to function as a world government. We welcome them all. They are surely doing some good work in their own ways. But they surely lack something and this we mean to provide.

United Nations is degenerating into an instrument of the American imperialism.

Many other movements, working for world unity, are more or less instruments in the hands of their States for their national benefit.

I do not deny that our movement will benefit our nation but as I stand at present in the opposition of our government you will have to admit that our World Federation is not a diplomatic hand-grenade in the hands of official India.

Yes, I speak of capturing Delhi. I consider it an early possibility that world federationists control the government of India or Aryan. If it happens, however, all the resources of this vast land—Iran to Assam—will be utilized to push forward the plan of our Federated World State.

I ask my country men to enlist themselves into our different organizations of castes, professions, unity of religions, Religion of Love, Union of the Martial races, our units among workers, peasants and students and our supporters among Hindus, Muslims, Sikhs or Christians, our friends in congress, Socialist Party and among Communists.

I adopt this line of action and I recommend it to you: Let world federationists encourage local patriotism as we do in case of Bengal, Punjab, Maharashtra, Pathanistan and the like. Let them work for the federation of their districts and their provinces as we do for Aryan and Asia. Then, see, what beliefs control your neighbours, let them all unite into their groups and these groups should be trained to function as part of your localities, districts or provinces.

In India, caste consciousness is very strong. I myself tried that the caste conscious-

ness may be weakened but I found that when it could not be ousted or suppressed it would be better to interweave the castes into our nation, as the Brahman mind once did. The Brahmins succeeded in weaving the castes into Hindu religious society.

At present party problem is far bigger than the religious question. Today millions have the same kind of fanaticism for their parties as the ancestors had for their religions.

Volunteers will have difficult task to bridge the gulfs of parties. But I show you the way. Take them as so many different thoughts. Speak of parties as bundles of thoughts and add that religions are also collections of some other thoughts. If our volunteers will imbibe this spirit thoroughly it would be very easy for them to turn the fighting thought groups into federal units of our world federation.

Volunteers! Our Volunteers! There are many kinds of volunteers in this chaotic world of today. There are volunteers who will kill with passion some other volunteers. Do you not see, soldiers killing soldiers in Korea, Indo-China and elsewhere? As I am writing these lines on the 12th of July 1951, they are talking armistice in Korea. I wish, peace comes. But

in our present day world, any time, in any part of our world, war can flare up and soldiers will start killing soldiers!

Volunteers! It is for you to save these youths, who are under the influence of some wrong ideas. From their childhood and through their education, they have been trained to love certain country, caste, religion or party. Their love develops into passion and they start killing blindly without knowing what they do!!

Volunteers! You must know, how tens of thousand good souls under the influence of the idea of non-violence or war-resistance suffered a lot. Poor people, they! They did not act with open eyes along the laws of Nature.

Volunteers! Study our literature. Do not be led away by a passage here or there. Man has to say many things under different circumstances. You see our development. You develop yourself as I tried to develop myself. Man grows. It is natural. You try to grow and help your neighbours to grow into world federationists.

Magnetism.

I do not claim that I have any such personal magnetism that millions will bow to

me at my bidding. Writers claim that Premier Mussolini, Leader Hitler and Comrade Lenin had very powerful magnetism. Mahatma Gandhi, too, commanded and still commands a very big following in our country. I fully realize that all my preaching is not producing the effect I want on our countrymen.

My voice is not ringing, my features are not attractive, I have no magnetism, I admit, but no one can dissuade me from believing that I give the message of the age.

I have seen a bit of the world. I travelled five times round the world. I was lecturing in the United States during my tours in that land. I was altogether six times in America and eleven times at Moscow. I extensively travelled in China and I was over fifteen years in Japan. I was over six years in Afghanistan. I visited thrice Pamirs and once Tibet, riding horses all the time. I was a guest of honour in the oldest monastery of Italy and I stayed in a Buddhist monastery of Tibet. I have studied Hindu, Muslim, Christian, Hebrew, Buddhist and Sikh scriptures. I know something about Bahai, Theosophy and such modern movements. I can say that some new teaching is needed which will bring harmony among the religious groups. Today parties have become more fanatic than the religions of a century back. They also need

some new set of ideas which will help them to serve society without unnecessary friction.

I claim that the way that I preach will bring about new harmonious atmosphere in the political field as well as in religious beliefs. In the beginning there may be indifference, later may develop severe opposition, it is all natural, but ultimately these views of this age, given to the world through me, will prevail in all the human race!!

Christ was crucified, where went his spiritual halo? Premier Mussolini and Mahatma Gandhi were cruelly murdered inspite of their magnetism. Leader Hitler was defeated and killed inspite of his great success for a number of years. Comrade Lenin fell ill and died and the best doctors could not save him. Miraculously God kept me alive to this day to preach this message. I had to sleep once in a snakes' dwelling hollow! I was attacked by robbers. I slept in open, in snows. A false step would have thrown me rolling over ice in the deep rushing river below!! British imperialism, backed by the great resources of the British empire, tried to capture me but somehow I was saved. Mahatma Gandhi very much appreciated my Religion of Love. He passed away after my arrival back in the country. For nearly last five years I have preached through out

India. I have many friends all over this land. I am now engaged in thorough reorganization of our people.

I preach Religion of Love. I hold meetings of the Unity of religions. I publish World Federation. I work for Aryan Federation. I ask the castes, professions and parties, to thus organize themselves that they all function as parts of one whole. I am teaching Morality and I organize Moral Front to clean the society.

In the name of "Dig Vijai" I toured a couple of districts and now I mean to take to preaching on a more systematic plan. Magnetism or no, I mean to carry on my duty as I understand it !!!

Why World Federation ?

Without some kind of federation of our world, without some kind of order on this earth, it is always possible that a nation rises and subdues its neighbours. I admit there is a natural law for this movement of peoples but why must we follow now, harmful actions of the childhood age of mankind.

Now we can understand the Law which wants peoples to mix and to give birth to new peoples. At the same time Nature wants to

preserve and improve the qualities of Man. All that prejudice which man has against mixing of the races is the Nature's endeavour to keep good qualities intact. But the urge in some people of going abroad is to help people mix culturally and in blood.

One great philosopher pointed out that anger is a natural phenomenon of life, it is there to remove some obstacle in acquiring the desire of man. But we also know that some people have more anger while some less. We also know that certain condition of health makes one more pettish. If a man is hungry he will also get easily annoyed. Man has not yet learned all the causes of his bad temper, he has much less studied the causes of nations' wrong actions.

The individual ego, individual attachments and prejudices make man partial and therefore a bad judge to judge individual actions. In the same way national ego and national traditions make nations partial to certain views and make them commit mistakes in judging human life as a whole.

World mentality and universal consciousness of humanity will have to be developed to see the world vision in right perspective. It is the need of the hour. We need not insist on

No. 24739

11.6.68

abolition of nations or suppression of the race idea. We should bring them in one fold of humanity.

World Federation is the urge of this age but trying as some people do, working against the laws of Nature, they do not succeed. We must accept that selfishness is in human nature. It is put there in man that he would try his best to keep his body in as good condition as possible. Love of the parents to their children or the love of children to their parents are absolutely needed to keep families in efficient condition. In the same way love of one's country and culture is needed to keep nations progressive and happy. Nations have to be made healthy and they have to be federated.

Under the present prevailing jungle life in society or among nations, social storms bring wars and bloodshed. To make healthy progressive life possible on this planet we must have World Federation. Preaching along federal line or world federation, party organizations should create enough influence through out all the States to bring about early Federal World Government.

If we do not take early steps and most resolute steps to make all the peoples world-unity minded, States will come to blows as they

came to blows during the last two world wars or as some peoples are locally fighting led by local and temporary, short-sighted interests.

It is written on the wall: "Now or Never!" Atom bomb seems to shout: "I shall kill this perverted animal—Man!" World Federation alone can save mankind and help it to transform into one joint family.

Superiority.

We can not deny, our denial can not efface the facts, it is a fact that some individuals are more gifted than others. We have to admit that some races or nations are more advanced. We also know that some mountains are higher than others. And if there are mountains, clad with beautiful green forest, there are also sandy deserts on our earth. Oceans, deserts and mountains combine to give us rain. Races are also expected to help each other to make mankind happy.

Europeans going out helped modern civilization to grow and spread through out the world. It is no flattery of the Christians but a fact of history that honest missionaries brought light to many dark corners of this earth. And without fear of being dubbed as a pro-communist, I assert that communism recently has

helped to raise the standard of living of the proletariat in all the world. Nature works thus!!

Races and religions, States and political parties, philosophies and sciences, were used and are used by Nature to make man happy. And if any racial or religious groups or States or parties begin to be extremely selfish and start most selfish exploitation of brother human beings or sister institutions they immediately start rolling down hill. Laws of Nature take note of all our actions, good and bad, and reward or punish, as we deserve.

Facts of history are that there were some very good kings who served their peoples very honestly, there were some well managed republics too, and there were wars, and some kings subdued their neighbouring kingdoms. How and why all that happened? In the interest of humanity!

Facts of life of the present day are that wars are still fought, some people win, others are defeated, through elections governments are changed too, lot of criticism or mud throwing goes on, very good brains use very convincing arguments. Why must they engage in this bloody struggle or in wordy blast? Nature utilizes them to remove some barrier here or improve some situation there!

What was nobility? A natural process to improve the human race. Human mind long ago discovered that by right mating and right training more thorough breed is developed. Strict laws about marriage were made, great consideration was paid to families, rules of life were prescribed, religious beliefs played a great part and nobility was developed.

Nobility deteriorated quickly in our age under the impulse of freedom. Society gave freedom to "nobles" to marry where they will and no check of religion was left on rich riotous young men. Women were also made free.

More conscientious men from lower strata rose and occupied the places of the rotten nobles. But these new nobles are losing ground because they have neither traditions nor moral rules to make them pious and God-fearing.

In our new age we need new code of life equally acceptable by the religious as well as atheist brethren. Lord Nirvana Buddha without preaching God, could lay down such a strong basis of society that Buddhism still stands strong after two thousand and five hundred years.

Buddhism preached renunciation and founded a brotherhood of beggars but infused in them very deep consciousness of superiority.

The same thing was done by Christ and Rasul Mohemmod. The fisher was asked to fish men and was assured that he would enter Heaven. Musalmans believed that they were specially called by God to set things right in society. Superiority? Yes! But to serve humanity.

I ask our federationists to believe that they are doing something which no party or sect was doing. They all divided people and made them fight. We take note of natural divisions but federate them into regions, continents and the world. We direct religious people to improve their own morals. And we build such a social system that villages, towns, countries and the entire world become joint families. Money, as we know it today, will not be needed. They will all work for community and receive all their needs. But qualities will be respected and they will receive better food, clothing and dwelling. Training from childhood will be such that superiority will not be crushed but encouraged. Cheating and falsehood will be suppressed. Honesty will be developed.

There will be however proper limit for better dwelling, clothing and food. Extremes will not be allowed. And if extremes will appear, inspite of our endeavours, believe me, entrenched superiority will be thrown out by Honesty!

Thought and Blood.

Thoughts appear in the interest of blood. Any and every thought which comes to man, comes to fulfil some desire of man. Man may be hungry and thoughts come to satisfy hunger. Man may be in love and thoughts come to get the object of love. Now if man does not take into consideration the like thoughts of brother man, he may clash here or come to blows there.

Noblest religion and most useful party are collections of certain thoughts which were produced by human mind under the guidance of universal-laws and they appeared to provide certain need of certain group or groups!!

The passionate attachment in man for certain thoughts is a law of Nature. Attachment is reduced to make man most active for the thoughts needed in certain section of society. If man could have more coolly considered the fact that other groups have been given the same kind of attachment, mankind would have eliminated unnecessary struggle long ago. But ofcourse till now we were living in a different age, age of donkeys, oxen and camels, it was not possible to take all-world view. Now we can more scientifically study the growth of thoughts, their need in life and how to create harmony in thoughts.

Ego helps man to bring out his best. National ego helps nations to make progress. Fanaticism of the communists, Roman Catholics or of the Musalmans surely helped them to grow. By Nature, we are partial to the ideas which we consider our own and we are unduly severe against the opposing thoughts.

If we honestly want Federated World State we shall have to establish thought laboratories, and without condemning any religious, political or economic system, we shall have to find out thoughts which create disharmony, friction or struggle.

Nature helps man to form family. Families grow into castes or tribes. Fighting here or there tribes are united into States. Religious ideas appeared to help tribes to live civilized life. It may seem strange but it is clear to us that communism, though denouncing religion, yet takes the form of religion! It has its creed and it has its priests. And prophet? Ofcourse, Carl Marx was the prophet and Lenin the Khalifa!

Fascism and Nazism took too the religious line of development. Mussolini became prophet and Hitler his first Khalifa. Our Congress through Mahatma Gandhi took a spiritual turn.

Capitalism was a natural growth. If production and distribution can not be arranged scientifically the individual urge to gain profit is the best motive power to supply the needs of society. Cursing capitalism without building joint family system in society is not correct. We curse not. We build or atleast show how to build joint family of every village, town, region, country and the world.

Individuals must get their needs. Groups must be satisfied in their places. Human currents should flow freely. But certain localities are more suited to certain races we must not insist that other peoples enter those localities. Mixing of peoples should also not be forced. Mixing should take natural course. If man and woman feel natural urge to come together, let them unite.

We know that deficiency in sex creates extreme jealousy, hatred and urge to murder! And we also know that deficiency in sex creates saints out of humble men. There is at present no system how best to check jealousy, hatred and murders and how to develop saints. Indirectly, through certain preaching and teaching mankind has been guided so far but there has not been organized effort to develop Man. Our best scientists, medical men and philosophers will be now utilized to direct right blood and thought in the interest of our human race.

Freedom.

There is a great attraction in this simple word : Freedom—Liberty. Thousands laid down their lives on the battle front to attain Liberty, Freedom. Hindu religion makes Liberty the ideal of Faith, freedom from this cycle of birth, death, rebirth is the goal of this life. This appealed to the Indian mind and they followed Hindu rules of life which were mostly to help society, directly or indirectly. People in Arabia were more influenced by the picture of happy Heaven, but the rules which were made to get into Heaven were such which helped this life, this human society. How human mind worked or how the universal mind helps human mind to act in the interest of mankind is a very interesting study. Science might see conflict every where but the Spiritual Knowledge sees a plan in the worst wars and storms of life.

The fact remains, with all our arguments, discussions, convictions and assertions we simply play our roles in the flow of Thought and the Thought helps the body, society, mankind. In spite of all wars, earthquakes, storms and famines and worst plagues, mankind could live on this planet for hundreds of thousand years. Our arguments and hot discussions do not stop for a moment the laws which help our

hearts to beat and blood to circulate in our bodies.

There can be no freedom from Universal Laws. If we act against the Laws we suffer. Happiness comes when we work along with the laws, in the interest of the creation, created by the laws and kept in order by them.

During the last one hundred years or a bit more, due to some new discoveries, the head of Man got swollen. He began to think that he was at war against Nature and that he conquered Nature, here and there! Poor little Man, a tiny blade of grass, tossing in the tied of time, forgot its place in Nature.

You can ask me, is it not a great contradiction, that once I call Man, the king of this world and now I consider him here a blade of grass? No! A cat for a rat may be a huge lion but before an elephant she is a tiny creature. Man is ofcourse the king of this world but in the vast universe, where-in our world is just a tiny pea, tossed in boundless space, man is but a fibre in a blade of grass!!

Man is not at war against Nature. In fact, Nature helped Man to grow to his present stature, just as Nature helps a child to become full grown man or woman. Through long

years, our mankind, growing in the present cycle of civilization, has reached the present stage of development. Mankind can perish today as winged insects perish on a flame of candle, or can grow to such heights that Man visits planets. It is up to us to help mankind to commit suicide or help to progress further.

The blind thoughts, leading Man blindly, are taking him to utter ruin. Our message of World Federation, with unity of religions and the economic system of joint family, can save mankind from ruin and will establish Heaven on this earth.

Social Laws.

We have reached this stage, growing more or less like a forest. But it is also a fact of life that Man made gardens. And gardens are not jungles.

We see brethren living in Central Africa, we see brethren living in our own country and we see brethren living in England or America. I can not allow any false pride of my native land to say that we live here more comfortably than in U.S. or U.K. We may take pride in our philosophies but our philosophies could not help Hindus in successfully checking Musalmans. Musalmans ruled the country for centuries.

And a stage reached in the age of Muslim Powers when they crumbled before Spanish, British, French and Dutch onslaught. And we saw Spain turning into a second class Power. And we see today England and France retreating all along the line. Holland has retreated too. But two new Powers have risen : U. S. and U. S. S. R. They are competing for world control. U.S. stands for capitalism. U.S.S.R. stands for communism. They both talk peace but they both are building huge military force.

India is still linked with U. K. India is still with in commonwealth. India, at present, has no independent foreign policy. She meekly follows British Labour government. Infact, India of today, is the creation of the British Labour. We followed Labour suggestions and threw the Indian princes into the lumber. We mean to do the same with landlords. We declared republic. But all this could not influence the British public as British Labour had hoped. They did not throw over board their king. American influence and American dollar won the day.

India is in danger of being caught into the storm which can sweep across the earth without any previous notice. In a way, the writing on the wall is sufficient notice but our leaders and our people pay little attention to

that warning: "Get out of the Commonwealth or perish!"

We are engaged in copying the British parliament, in keeping intact British-made administration and in loyally following British suggestions. We have not yet started to look into the filth which was here purposely accumulated by foreign usurpers. With the prevailing conceptions of society, with the prevailing social laws, we must sink deeper into the mire. Our task is to cleanse our society and enact new Social Laws.

These laws can not be enacted by the present machinery of law making. You can clean nothing by dirty hands. There is no lack of honest persons in our country. Some such honest people flocked at the call of Mahatma Gandhi. I admit my call is not yet heard by these honest brethren. Their British background and my German, Afghan, Soviets, Chinese and Japanese experiences make us miles apart. But I am not utterly disappointed. I am sure to find my volunteers a day early or a day late. I have my friends, my followers and my faithful fellow workers. The present lethargy or ignorance of the general public towards my plan and programme can not last long.

Degenerated Society.

I do believe that Rev. Luther did some good work in breaking the chains, thrown around the European peoples, in the name of religion. I also believe that the French Revolution performed a measure operation on the political cancer of Europe. Such was another serious operation performed by Russia, under the guidance of the Jew doctors. This operation became necessary on account of a modern disease in the stomach of society. But I hold that since all the old moral laws of society broke down under the sudden out burst of freedom no attempt has yet been made to make new social laws or to rediscover the eternal ethics. The result has been the most degenerated society seen through out the pages of known history.

You need only look at night clubs of the port cities, lack of morals in our homes and perverted teachings prevalent in society to convince you of this statement. The crowded cinemas speak loud of our degeneration. The palaces of film stars in Hollywood and great income of the film business every where prove the perverted passion for lowly enjoyment of the common Man!

Cricket, football, hockey, bull fights, fist fights, racing, cross-word, game of letters,

drinking, dancing as they are indulged in and as fashionable gambling is conducted by the so-called civilized society prove the depth of degeneration to which this unbridled society is sunk!

God surely created this world for His pleasure and He enjoys life through the living creatures and man can bestow on Him higher pleasure of life than trees, insects, birds and beasts. But He does not like man indulging in any such pleasures which end in pain, disease and quarrels. The wars which were fought, wars now in process and misery of masses all over the world are the direct result of Man's immoral life!!

In Man's own interest I preach morality. I do not say that man should perform penances, I do not recommend that man should remain naked or starve himself. I say, enjoy life. enjoy beauties of Nature. You can ofcourse marry. True religion makes man permanently happy. Religion prohibits drinking and wild dancing, because these end in bad health, poverty and quarrels. Games, fanning up passion to win, indirectly teach wars to win. Society has to be scientifically reorganized in a way that man learns to live together, work together and enjoy the fruits of labour together. These thoughts which we call nationalism,

socialism, communism, and the like appeared to remove superstitions and to teach man to make a collective effort to make society well organized and happy.

Moral Laws.

There are certain eternal moral laws. For instance, Truth is an absolute necessity for civilized life. In fact, our progress or failure depends on our Truth. The more we are truthful, the greater and better organized society we would have. I can not say that any man or any group of men is absolutely true to the core. But I can say that for every progress in life you can trace that progress to Truth. You might have heard people saying that such and such person became rich by falsehood, cunning or by luck. They forget that no one can deceive others if there is no truthful appearance or some truthful ways. To get that look or manners, his parents' or family's honesty worked hard for a long time. And then deception is possible when they are all running after wealth.

I insist that Truth is absolutely necessary for the well being of our society. If people indulge in falsehood they can never cooperate. Suspicion never allows men to work together in harmony.

They have distorted facts of history but for any honest student of the rise and fall of past empires it is very clear that certain good qualities of the people made them strong and they began to build an empire and when wealth and power made people luxurious, pleasure loving and cruel exploiters their empire crumbled!

The Law 'as you sow, so you reap' is universally true. In religion, in politics and in every social order, in fact, for every individual this law holds good. Some times people get misled seeing a Christ crucified and a robber or a black marketeer enjoying wealth. It is due to narrow view of life. A Christ by his sacrifice purifies society and all evil gains are surely very temporary.

If in a group of people or society such ideas become prevalent that there is no punishment for evil and honesty never pays, believe me, that society, or the group of people, is rolling down hill and would meet some kind of catastrophe at no distant date. You can not escape from the eternal Law. You can escape from man-made law but not from the Law which keeps the earth revolving round the Sun and keeps the Sun glowing!

I admit power of evil is very strong. Temptations come across at every few steps in

life. But the long experience of ages in our sub-conscious mind and the teachings of morality, discipline and religion very often save us and our society and guide us right.

We need today strong social, political and moral organization to make life safe from evil. You can not on one hand multiply temptations and on the other hand expect man to lead moral life. We therefore reorganize our society, on moral basis and not on the basis of rowdy, freedom as prevalent at present.

I can not repeat too often that cinemas exciting sex and eulogizing crime must be stopped. Games developing the spirit to win must be discouraged. Gamble in every form should have no place in society. Fine recreations are necessary. Occasional picnic parties, soft music for a little while after dinner or swimming by way of bathing are healthy pastimes. Horse racing, bull fights or boxing can not be permitted. Cross word game is most silly and harmful. Drinking and dancing should not be indulged in as at present.

There has not been yet planning in life. For instance, production and distribution most vital for civilized life have gone on in a haphazard way. Perhaps, scientific planning of life was not possible before this day. Mankind in its present cycle was in its childhood.

Nature developed humanity to the present stage of maturity now Nature expects our brains, also developed by Nature, to do the gardening in the jungle of growth. We should have a special institution to study the Laws of Nature and to mould life according to the eternal and universal laws, which teach morality as a necessity for healthy human life!

Production & Distribution.

Scientific planning to have right production and distribution is the immediate need of our age. How far individual initiative should be allowed to play its role and how far regimentation should be introduced in life is the great question. That sentimental hatred of the modern ideas of socialism or communism or that blind belief that all what went under the name of religion was poisonous are disturbing our society. Those religious wars, fought in the name of certain creeds, in the old world, could be excused, considering the poor knowledge of this earth in those days. But how can we permit today all this propaganda against U. S. or U. S. S. R., against Russians, Anglo-Saxons, Germans, Chinese or Japanese. All what they need is happy, healthy life for themselves. But as they work under the influence of some wrong ideas they create misery for all the human race.

"Now or Never" is written on the wall! We must make it clear that all this trouble is directly born of unscientific production and distribution. You need not defeat this or that nation. All you need is to start world wide propaganda that mankind immediately needs scientific production and distribution.

The object of scientific production and distribution shall be that all the persons born on this earth shall be guaranteed all their needs from birth to death.

It is no picture of happy heaven, it is no toy to console a hungry child, it is a cut and dry plan to satisfy every human being. It can be put into practice immediately. Our modern States, having been developed to this stage, can introduce it at once, in their lands, within their boundaries. They need only feel the necessity of scientific production and distribution.

The principle should be accepted that no person can be allowed to remain without work or without food. All the old, cripple or sick have to be provided with their needs. Every village and town shall be turned into a joint family. Elderly and wise shall guide, children will be properly trained and educated. Healthy and strong shall serve their joint families of their villages and towns.

Make not hard and fast rules to be observed alike in all the countries. Circumstances, based on different traditions and notions of life, greatly differ from land to land. Let them have their own dictators, presidents or kings or just headmen of their communities, but in all cases, from a village to the remotest islet of this earth, will remain federated into one World State.

Let every village and town organize production and distribution. In these days, millions are wasting their precious time and energy under the wrong notions of foolish freedom! My book of the Religion of Love prescribes as a part of the twice a day prayer that we give account of time and learn not to waste time. If we all use, all the available time, to make life happy and secure, we shall be living here in a paradise.

Do you know, what these numerous shopkeepers and hawkers are doing? They are simply distributing the necessities. And the peasants, factories and the mines are producing.

At present sheer instinct to advance, live well and win in the struggle of life compels persons to trade or open shops. Indirectly, they help distribution. A certain instinct to live free or independent makes people to start

their own business. But when we could curb the desire of independence among tribes and stop their perpetual tribal warfare we could build empires. When we advanced and combined and founded companies we won the business war over individual enterprises. Now we have to curb the national ego in our common interest and build federation. We have to stop economic struggle among companies and nations to build a joint family of all the human race.

We have to plan at home and teach around that scientific planning of production and distribution will make care free life. We have to show how planned life makes life happy. Let us start building a joint family of a village or town, on the basis of natural laws.

A Joint Family.

See how a natural family works. No two brothers are entirely equal. Even twins are not born at the same time, there is surely difference of hours or minutes. Parents are naturally elderly. In a joint family they do not divide property. They eat together. They get their needs but they jointly own their wealth. It is what I mean to introduce in all the villages, towns, countries, in fact, in all the world. But as private property ideal has gone so far that brothers got separated and got

divided their property, it is not possible to force them at once to live jointly. Habit of separate living will make them feel miserable if we compel them to make a joint family.

In a town or village, wealth among different families is not equal. The rich will not be willing to share their wealth with the poor. In a way all the governments compel the rich to a certain extent to give up a part of their wealth for the poor. It is the meaning of taxing the wealth and of providing some facilities for the poor. What part of the riches is taken in taxes and how those taxes are used to remove poverty and safeguard society are two most important questions when building joint family.

We can not make all alike. Differences in beauty, strength, intellect and morality are very conspicuous. We can not make them all alike, nor is it desirable. Differences in earth surface help wind to blow and rain to fall.

If extremes appear in the atmosphere storms come to equalise temperature. How many times indeed, you must have yourself complained that it was very hot and you or some one must have added that storm or rain would come. Such is Nature.

A boy or a girl reaches maturity and he or she starts playing the game of love. Elderly relations or friends might warn the youth but youths behave more or less in the same way. Such is Nature.

Rain falls and green grass appears, frogs start making noise and many little insects come, flying from some where, and die in thousands over the flickering flame of a candle. Why? You can not understand this great way in nature. Those insects, how beautifully shaped, coloured and propelled and yet all this masterly workmanship to disappear in a twinkling of an eye, burning up, or lying around writhing, dying slow death! Such is Nature.

Man thinks himself all-wise. Man speaks some times that he conquered Nature! Poor fellow forgets that his thinking is itself a part of the nature's creation. Yet, none can deny. Man can run today faster in his cars than any beast and can fly far swifter than any bird. But small microbes kill wisest of men, eating their lungs, or making their homes in the intestines of men! Such is Nature.

We hold that the views which I propagate or the like views which are circulated by numerous men around this globe, at this time, are natural growth of this age. How could,

for instance, tiny States of the past ages, speak of world unity. They were often at war with their neighbours. They had no idea of the unity of humanity. Their immediate problem was to protect their States. Naturally they could not possibly think in terms of one world. But now when man can fly round the world in one week and hear in a minute news from the farthest radio stations of the world, ideas of World State, unity of religions and scientific production and distribution of all the necessities are growing in all thinking mankind.

Here we are dealing with the joint family. We believe that it is the best solution of all our economic ills. We know that socialism and communism try to solve our economic problems in their own ways. I know that there are numerous suggestions to improve our monetary system. But they fall flat on the main features of life. They keep the masses entangled in the same give and take, struggle for petty gains and international wars. Soviet Russia which could go far ahead of the French revolution along economic reforms still has its banking system and the currency. Salaries are paid in so many bank notes much on the same pattern as in America.

Our system of joint family, backed by the unity of religions, is quite different from

any prevailing systems. If our communist brethren care to call religion opium, we do not mind, we give a heavy dose of religious ideas and instil faith. Without this Faith no healthy human life is possible. In a way, the communists also create some strong beliefs in class war, material development of human society and in their prophets, Comrades Karl Marx, Lenin and Stalin. But these beliefs fall much short of human mental needs. At least men like me are not satisfied. If you feel satisfied, believe me, I shall not disturb your peace of mind!

We need joint family of all the human race, from a village to the capital of the world. We all learn to live together, work together and enjoy the fruits of our labour together. We shall live and work with faith that the Creative Element, which developed man on this planet and keeps mankind alive, wishes good of all the human race, individually and collectively.

Faith.

Faith is absolutely necessary. We need faith in Federated World State. We need faith in the unity of religions. And we need faith in the joint family of our human race!!!

By all kinds of arguments we must convince ourselves of the immediate need of

World Federation. Doubts always appear, we have to fight our doubts and the doubts of our neighbours, all the time!!

Every religion stands on a certain faith. All the parties, including the Godless party, make themselves strong by instilling certain beliefs among their followers. Without faith no party, religion, state or nation can live a single day. In Soviet Russia "The Capital" of Karl Marx is the Rig Veda and the Material History of the World is the great Puran. Strong Faith is created in the dogmas of the Communist Party.

We want to create strong Faith too: Faith in the unity of the human race, in the unity of all the religions and in the necessity of the frictionless society, where all mankind lives as in one joint family. Doubts will appear as they always do. Doubts will flock and assert, it is sheer utopia, there can be no unity on this earth, man always fought and he shall always fight, there are basic differences among races and religions, they can never harmoniously function. We shall always fight all such doubts and organize our society in a way that there would be very little chance left to create disturbances. Dissatisfaction is one great cause of disturbing the peace in society. We shall do all in our power to eliminate want, eliminate

the causes of friction. We shall make them all live happy, in happy human family.

To begin with by a stroke of pen we shall declare that every village and town is a joint family. All the elderly people will become overnight fathers and mothers of their villages and towns.

Our organization will bring real freedom, true happiness and complete security to villages, towns and countries. World order can not be brought about by the prevailing democratic methods. People brought up and trained in a certain atmosphere can never give votes to a new plan. Our volunteers have to work hard to create a strong, active and fully convinced minority in every locality. This minority will do the needed miracle.

It must be clear to our workers that the Communists, Roman Catholics and the Musalmans have that Faith which acts, works hard and is extremely stubborn. Hindus, Buddhists, Protestants, or Socialists, democrats and republicans have not that urge of expansion which can stand as a menace to world movement. Local nationalism or State consciousness can hinder locally one world order but they can prove very useful too if they are interwoven into world federation.

We shall have to analyse the Communists, Roman Catholics and the Musalmans. By correct analysis we would find that certain nations or races are their real strength.

Jews started communism but today Russians represent the power behind this new faith. Russian State, however, is made up of many nationalities and now the Chinese have joined this brotherhood. It will prove their weakness instead of their strength. They have no plan like our geography. Their urge for expansion will make them fight among themselves.

Roman Catholics fought and so fought Musalmans among themselves. And today they are going down the hill. Italians who were power behind Catholics are more inclined towards non-religious movements of nationalism, socialism and communism. Spanish America is divided into small States.

Arabs were the power behind Islam but Arabs are badly divided and too weak. Poor Musalmans have certain strong faith but they are more utilized by non-Muslim States of England or France.

World Federationists through their unity of religions will be able to satisfy Muslims and

the Catholics and through their plan of joint family for all the villages, towns, countries and indeed all humanity they should be able to receive cooperation of the communists.

Immediate Problems.

We must attend to our immediate problems. See yourself what difficulties you meet in promoting our movement. You find your own remedies according to your circumstances. I relate here my difficulties. If you can learn any thing from my circumstances, I shall be very glad. I tell you here my present condition, condition of my country and the forces which are struggling around me for complete conquest.

Tonight is 17th May 1952. I started to write this booklet last year. I quickly finished most of it but then came the news of elections, preparation for the struggle and then the actual fight. I had no mind to contest but my friends persuaded me to try and I tried, supported by my numerous friends. We put up a good fight but I got defeated by the Congress Party. I was all along in the Congress but due to this contest against the wishes of the High Command I was expelled from the party. I fought as an independent.

The Congress Party is in power. It controls nearly all the States and controls the Central government at Delhi. I am opposing tooth and nail, knowing full well that the government can arrest me, put me in jail and make me a pauper. I do not mind. I have repeatedly challenged the government to do their worst against me. My Faith upholds me. I honestly believe that I have God given Mission. Even if I am crucified, it would be in the interest of the cause for which I was given birth and I have been kept alive so long.

India is in the grip of the British training. Seven hundred years' rule of the Muslim monarches has left deep impressions on our society. We think that we think but infact we think as we have been long taught to think. It should be plain to all our readers that this kind of eletion and parliament, this system of government, what we have, were introduced by the British. Were they loaded on us in our interest? Not at all. We were beaten, put in jails, hanged to teach us the way of thinking that we have. It was all done in the interest of the British rulers.

You might be inclined to say that it was the spirit of the time. It could not have been otherwise. "Look, the European States generally follow this parliamentary system and it is also

prevalent in Americas, North and South!" Germany, Italy and Japan rebelled against this system and Soviet Russia is putting up stiff fight. I believe that our salvation also lies in repudiating it.

Our Government is entirely built by the British. The so-called national government is just the continuation of the British made administration. In spite of loud heralding of entirely independent republic, India and Pakistan are both members of the British Commonwealth.

The worst is that the British training has gone so deep into the minds of our people that they would not listen to me and to people like me.

Communists say that they work for the workers and peasants but do all the peasants and the workers listen to them? No! Russian communists could not convert Germans and the Japanese to communism. See and ponder, why the British workers and peasants do not turn red? Long training has its say!

Why must I oppose our government and go against the prevailing public opinion? Is it not better for me to support the government and get rich reward? Why not follow the

general trend of opinion and live happy in the sun shine of glory? No, I think, I should not! I have my Mission. Country has to be freed from the British influence, country has to be reunited and world federation has to be realized to end war and to make every country secure and prosperous.

Immediate Action.

Immediate action is needed if we want to save our country from imminent danger. The government members and their appendages seem to be fully satisfied with their victory at the polls, just ended. They feel secure in their places. They think, there is no power on earth which can oust them. They believe, international situation is entirely in their favour. They are leaning on the Anglo-American bloc and they believe that that bloc is invincible. They proudly look back at the last two world wars and feel confident of their convictions. "Did we not decide right in taking the British side?" they seem to say!

And I? Well I took the opposite side in both the world wars. In the first, I was very active, I headed the Provisional Government of India. In the second, I did not take any active part but I did oppose the British side. Netaji Subhash Chandra Bose, however, took very

prominent part on the opposite side, in the second world war.

I well remember, Sardar Mhd. Aziz Khan, one of the half brothers of the late King Nadir Khan, when he was the Afghan Ambassador at Moscow, told me: "Raja Sahib, if we had sided with the Germans, as you desired, we would have perished!" Let me here digress a bit. Let me tell you that when in October 1915 we were taken to Paghman to meet the king for the first time, this gentleman took us—Indo-Turco—German mission. And he was the Afghan Ambassador at Moscow in 1931 when my going into Soviet Russia was stopped at Valadivostok. This gentleman was later murdered at Moscow by a young Afghan.

Pro-British thought and think that they hold India in their grip and that the third world war will make them absolute rulers in the land.

I and my friends think that the first and the second world wars were only two big battles of the Great War of the age in progress. The whole system of society will be renovated and the society will be reestablished on eternal principles.

The French Revolution and the Communist Revolution helped mankind in breaking the

chains which were tied around it by the wickedness of the drunkards, and the debauchees. Mahatma Gandhi helped humanity by instilling certain spirituality in politics. But the great work of bringing unity and spirituality among nations, States, races and religions has yet to be done. Our World Federation is doing that job!

Immediate action is needed to snatch Delhi from the pro-British friends and the dishonest Anglo-American agents. We must capture Delhi.

Immediate action is needed to free Japan and Germany. These two great nations can best contribute their great energy and intelligence in building World Federation.

Italy which is India of Europe, in every possible way, will surely help the great cause.

People might think that I am anti Anglo-Saxons and the French. But I respect English culture. I write here in English language. I love the French for their inter-racial broad-minded-spirit.

However I hold the British, French and American U. S. States responsible for the last two world wars. And they are keeping up the war fever and hindering world peace.

As a builder of world order I must see what material is at hand for the work, what new material we must produce and what obstacles have to be removed.

Speaking generally against imperialism, colonialism, monarchy, feudalism, capitalism or communism confuses the issue. That is why, indeed that true world order has not yet made any headway.

League of Nations and now the United Nations were and are monopolised by Anglo-Franco-American bloc. This is not the way to develop Federated World State.

We would do it. In India or Aryan I must seek proper individuals and groups who would assist in this great task. Any man of any caste, class or creed, if he is convinced of the necessity of one world, he is our man. Dissatisfied persons in the government and the Congress can prove very helpful in our task. The martial races generally which are being degraded and pushed back by the present custodians of the country will prove most useful material in evolving Aryan and in building World Federation.

In world, it is the same situation. Honest people of tender hearts who are convinced

world federationists are our men, no matter where they were born or what language they speak. People of Anglo-Franco-American bloc, who are dissatisfied with their governments can help us admirably. But the greatest help for our cause will come from great nations cruelly suppressed by the ruling States of the last one hundred years. It is what we learn from the successful administration of the colonial empires of England, France and the United States of America.

People, who tell us, not to speak of castes and nations when we want to build unity of the world, are either led away by pious wishes or are fools or are hypocrites in the pay of the great powers.

We have not yet dealt intelligently in building world peace, based on a just world order. We mean to do it without any foolish fanaticism, prejudice and misleading ideas.

Immediate action requires immediate organization. Build groups of honest people, dissatisfied elements and of the martial races. We shall penetrate into police and army. No humbug of party should be allowed to check our progress. We stand for religious unity. We build a society as that of joint family. Who will oppose us? They and they alone

who are today well off, entrenched in their positions and do not want to give up their ill acquired easy chairs!!!

Success or Failure.

It depends on you! I do not say here, it depends on God. Well, our very existence depends on God or the eternal Life which lives in this body of the universe. But we are here according to the Law. We are free to do good or to do evil. We are punished for every wrong step and we are rewarded if we judge right and act right. It depends on you how to build our future.

We mean to build happy and secure future for our human race. It is what World Federation aims at. We federate the States, unite the religions and settle the economic problems by making a joint family of all mankind.

Step by step, our plan asks us to move forward. Make propaganda of world federation, create active groups, among all the existing groups, to spread our mission, and capture the government. All the States should be brought under the control of people who honestly believe in our programme or sincerely sympathize with it. There is no other way to establish Federated World State.

We know that Soviet Russia would like to have world federation of communist States. It is also clear to us that the Anglo American bloc would like to conquer the world and rule the earth.

If the Soviet plan succeeds all the past would be regarded as the dark age and Mr. Karl Marx would be regarded as the Prophet, the new Moses of this age. A new religion of communism will develop. Nations will continue to struggle. Jews or Germans might be able to control the Russians. Japan turning red might be invading the United States as Mahmud Ghaznavi invaded India.

The victory of the Anglo American bloc would establish rigid caste system in the world. The whites would be new Brahmans, Anglo Saxons taking their place at the top, next to them coming French, Germans, Italians, Spanish, Russians, Greeks and the like. Mongolians would become Kshatrias or the martial people, who would build States but would worship the whites. Indians and the Arabs would take the place of Banias, the trading people, meek, modest, non-violent and attending to business. Capitalism in its present form would continue.

There is also another possibility that the new inventions destroy the present civilization

and man reverts to jungle life, but if Anglo-Americans succeed in their plans the Negroes, and millions of people of Africa would be made Shudras, and the most backward among them would be declared the untouchables.

The only hope of humanity, in the shadow of these sinister circumstances, is our World Federation, with unity of religions, joint family system from a village to the world capital, with local liberty but all unity in Federated World State!

Our success or failure depends on you, whether you help us or not, in capturing Delhi. Our country is still a part of the British empire, though it is named Commonwealth yet it makes very little difference for all practical purposes. We are helping the Anglo-American bloc in its designs. We have no independent plan or programme, in fact we have no independent existence. If the present war continues, as it has continued so long, victory or defeat would be of the Anglo-Franco-American bloc.

During hot war we would have troubles in the country, uprisings from the rightists and from the leftists, Soviet or red forces would attack us, Anglo-American armies would land here to save us. Our fate would be that of Korea, fighting and destruction continuing in

our country for a couple of years. Whoever may win, we would be loser.

But if we capture Delhi, morally or physically, if Delhi becomes world federationist, parliament would be dissolved, legislative assemblies would disappear, power would go to the people. Every village and town would be turned into joint families. Workers would become partners in factories, railways, shipping and mines. Schools would have their own fields and factories. All this would happen at a stroke of pen. Army would be built up to the strength of six millions or more. Martial races would build this force. But here again, as in schools, cantonments would have fields and factories. Robbers will disappear. They will be enlisted into our army. Thieves will disappear because villages will be joint families. All the true Sadhus, Pandits, Mullahs, Christian Priests and Granthies would be utilized to make society happy and peaceful. Honest communists, honestly wishing well of community, will be put to work as well, in building world federation society.

No Worry.

I worry not. I am just doing my duty according to my best knowledge. I got my life I was given birth, according to certain laws of

Nature. The same laws made me grow into man. My knowledge grew too.

One can say : I do not know why there must be evil in life, but it is there as an unavoidable phase of the creation. Diseases, pain, loss, worry, thorns, snakes are there. There are also, however, cows, flowers, satisfaction, gain, pleasure and health. We have also knowledge to distinguish between evil and goodness.

Passing through diseases, suffering pain and loss, experiencing worry and facing many kinds of dangers I have reached the present ripe age of sixty five years. I see in all this design of God or Nature. When I was telling a friend, how I escaped death several times, he began to relate his stories, how he escaped death on the battle field when his comrades were shot dead. People are and people will be who would not see any thing extraordinary in my life. There are some Arya Samajies who denounce Rasul Mohemmod though three hundred fifty million people respect him as their only religious leader. Whatever we might say about this or that man, or about ourselves but certain facts of life can not be gain said. I can not say that I am in the position of Pandit Jawaher Lal Nehru. Nor can I claim that there is no difference between me and my sweeper."

There are many Swamies, Goswamies, Mahants and Mullahs who can count their followers by thousands. There are many party leaders with their large followings. These are facts. I do not refute them.

I do not deny, I myself assert that more people follow Jesus Christ than any other leader of humanity. Mahatma Gandhi could not oust Jesus. More people follow Buddha than Rasul Mohemmod, and more people follow Rasul than Lord Shri Krishna.

It is also a fact in our own time communism has spread like a forest fire. Karl Marx is revered by millions of men like a prophet of this age. Now when communism is gaining strength in our own country and now when thousands are busy in our land to make a religion of Gandhism, it might appear to many preposterous that I dare to give a new dispensation.

I get sick like any other human, I feel hungry, I sleep, what is there extraordinary about me to claim that I am entrusted with the Mission of the age? My Mission itself is that something wonderful, like which you will not find any where on this earth!

I worry not about my future. No! I worry not about the future of my mission. If it is indeed God given, if God wants to establish Federated World State, with unity of religions and the economic system of a joint family it must come to pass. And I sincerely believe that it is God given and that no power on earth can stop the federation of our world on the plan that I teach.

It is only matter of time. I see clearly in the happenings, since I entered the public life that the mysterious devine hand guided me and shaped the affairs round me to help the growth of my Mission, day by day, year by year and decade by decade!!!

I have reached the present stage. I can say, now I have my some following. I had admirers, I had sympathizers and I had also some supporters but I had not a following. Now I have. Thousands today follow my Religion of Love or they have formally entered one or the other of my federations or unions.

Aryan Peshwa.

In this booklet some space was left. Printers told me, I could put in a couple of pages more. I take this opportunity to add this most recent fact.

On the 3rd of August 1952, I have been declared Aryan Peshwa by the All India Martial Races Union. They have recognised me as the only Leader of the Martial Races. It is no joke. It is some thing very great. It looks, as if our wildest dreams can be given shape at no distant date. Our army, army of Delhi and Karachi, is built of the martial races. If they can be influenced by my propaganda, without any fighting our Aryan will be realised!

Soldiers have to be properly approached here in India and through out the world. Wars kill these youths, still full of hopes. They perish on man made altars, led like oxen for some whims.

Pacifists of the world have proved quite useless in stopping wars. In the life time of Mahatma Gandhi two world wars were fought and blood was shed in streams at Delhi when he himself was there. Millions of people who bow to Jesus Christ or Lord Nirvana Buddha made wars, fought battles and still continue to shed blood mercilessly. Most barbarous human killing continues in Korea, French Indo-China and Malaya as I write these lines on Sunday the 7th September, 1952.

Soldiers have to be put to work. I have a plan to provide family quarters to the soldiers in cantonments. Soldiers will learn

military art for three hours and for five hours they would work on camp fields, factories and the dairy farms. And they would be taught the ideal of world unity, with local liberty, unity of religions and they would live as in one joint family.

Pacifists would laugh and say : Why have soldiers at all? This is their simplicity of thinking, they do not learn by human experience. They might as well say : Why have doctors at all? In nature there are germs, microbes and pests. In man himself there are passions, hatred, repugnance and wild love. We have to be alert all the time against evil.

Ours is a very scientific plan to make all mankind peaceful and happy. We give best possible ideas of unity and organise every locality and the world as a whole to ban want. We put all to work and we guarantee the daily bread to every individual from birth to death.

The government, as developed by the British imperial hand through ten decads, would not listen to me. There are some very honest men in the government and the ruling party but they are helpless. They are forced to act as wheels of the heartless machine.

I therefore say we would capture Delhi. Karachi would be captured too. If the martial

racess honestly support me, as they have bravely promised, it is only a matter time when we completely succeed in our aim.

I am not an enemy of our political leaders. I support our religious leaders. I am now running a race with our communist country men with the spirit of a sportsman. Without hatred or prejudice, I compete with them. With a conviction I am fighting. I have God-given Mission. I shall turn the tide of anti-religion and make the world safe for morality. I shall build a happy human family of all the human race.

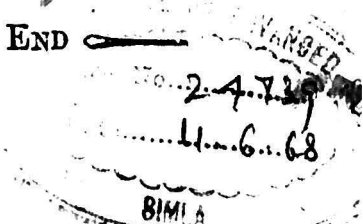

Communists !

BRETHREN! You do not know, you are being led by certain ideas. The qualities of your blood make you fanatic or philosophic.

Roman Catholics? Hindus? Muslims? Socialists? Yes, yes, they are all being led by the ideas they got from their families or friends.

I? Yes, I have also ideas. But I got them from all world experience. They are needed in our age. I work to put all to work for all, to make all happy. I eliminate friction producing ideas from all religions and political parties.

— THE END —

This is our Prayer :

“Om, Devah, Love, Allah, Jehovah! In all places Thou alone Thou art. Whatever is seen, or is not seen, whatever is—it is even Thy body, even Thy soul, even Thy glory—all is one, one alone. I am in Thee and all other persons are in Thee. All of us are the parts of one. Among all of us there should exist such love as there exists between one part of the body and the other. Love alone is the whole religion.

“O Infinite Love! Let me not part from this knowledge and never let me fall into the traps of egoism or sensuality, neither may I have false love nor an ambition of honour or wealth. May I never speak falsehood, never may I have unreasonable anger.

“Eternal Love! I, acting according to religion, may remain quite fearless. Justice, truth, kindness and forgiveness may keep my heart enlightened. I may ever serve mankind and may all people serve humanity.”
